JAVA RICE BIRD AT HOME HERE

Have you noticed the little bird who sits so quietly in his cage in the corner of E. J. Lee's Dress Shop? This is a grey bird with white chest and red feet. Originally from Java where his kind are found in the rice fields, he gets his name, Rice bird, from the food he feeds upon, they are also known as Temple birds. Unlike the parakeet who can be taught to talk and chatters a great deal, the Rice bird is very quiet and only speaks when he is hungry. His speaking voice is not too pleasant to listen to, it is more of a shriek and a jabber combination.
