

BASS TRIP:

Some 60,000 finerling bass came through one of the longest hauls known. From the U. S. hatchery at Miles City, Montana they were brought to Oregon and released in various lakes and reservoirs of Harney and Malheur counties, and others in scattering dredge ponds and lakes elsewhere in eastern Oregon. In all, they travelled 1000 miles or more from their birthplace.

Letter To The Editor

Mr. Bud Pisarek, Pilot.
Dear Mr. Pisarek:
I have read with a great deal of interest the report of Mr. W. J. Ward relative to the development of Brookings harbor and the Chetco river which you printed in your issue of October 18.
As some of our boys may have told you, my interest in Brookings extends back over a long period

of time, and I am very eager to learn about anything being done to develop that area.

Assuring you of my appreciation of your thoughtfulness in sending this to me, I am,

Sincerely,
H. J. Walker, Cashier,
United States National Bank,
Portland.

VOTE NOV. 6

The Potential Demand Is Strikingly Up For Timber Products

TRR developed two sets of estimates of potential demand for timber products in year 1975 and year 2000. One set—the so-called "lower level" estimates—was derived from a projection of past consumption trends, product by product, as influenced by the basic economic assumptions. These estimates reflect a relative decrease in the use of wood, declining per capita consumption, and an increase in real price.

The other Set—the "upper level" estimates—is based on the assumption that wood will continue to occupy about the same place that it does now in the national economy and will continue to make up the same proportion of consumption of all physical structure raw materials as at present. (Infact, since the preparation of TRR, one industrialists and economists have indicated that the upper level estimates may be too low.) Both the lower and upper level estimates indicate substantial increases over 1952 in

the amount of wood which would be consumed.

The lower level estimates for 2000 indicates that demand for industrial wood (excluding fuel wood) would be 67% greater than 1952 consumption. But even with this large absolute increase there would be a decline in annual consumption per capita from 65 to 62 cubic feet.

The upper level estimate for 2000 indicates that demand for industrial wood would be 105 percent above 1952 consumption. This would mean a per capita increase from 56 to 76 cubic feet.

In actual figures potential demand estimates for the year 2000 are 18 and 22 billion cubic feet for the lower and upper level estimates respectively, in contrast to 1952 consumption of some 12 billion cubic feet. These potential demand estimates would require a timber cut of 69 and 95 billion feet of saw timber in contrast to the 1952 cut of 49 billion board feet.

Will Curry County be able to contribute its rightful share to this wood production in year 2000? Our young timber stands

are growing fast. The Chetco District of National Forest alone can be cutting 30 million board feet of timber per year by year 2000. The cut on private lands will depend upon how the landowners are treating their land today.

GOVERNOR ELMO SMITH gives active leadership

LIQUOR CLEANUP—One of Governor Smith's first acts was reorganization of the Liquor Control Commission with instructions that it must deserve the complete confidence of the people . . . and stop sale of liquor to minors.

HIGHWAYS—No governor has been better informed on highway problems. Oregon's 72 million dollar highway program was developed under his senate leadership. His leadership in highway development is nationally recognized.

THE AGING—While insisting that Old Age Assistance payments recognize higher living and medical costs, Governor Smith has given equal emphasis to programs that will utilize the skills and experience of our older people and furnish recreation they can enjoy. He has recommended a permanent state committee to formulate such programs.

KEEP ELMO SMITH Governor
A Governor for the people of Oregon like and trust!

Pt. Adv. Keep Elmo Smith Gov. Comm. R.A. (Dick) Rawlinson, Chm. 153 So. Liberty, Salem, Oregon

VOTE 105 X ELLSWORTH

For CONGRESS . . . Keep A Really Good Man On The Job In Washington D. C.

Congressman Ellsworth was author of legislation settling long standing O & C land controversy releasing impounded funds to the treasuries of 4th District county governments.

Congressman Ellsworth, a former Vice President of the Oregon Wildlife Federation has worked for protection of fishery and Wildlife resources, improved recreational facilities, soil conservation projects, sustained yield forestry, better water use and other conservation measures.

Harris Ellsworth is the only Congressman from 18 western states who is a member of the House Rules Committee—the most powerful Committee in the House of Representatives—assuring attention and consideration for the problems of the 4th district. Congressman Ellsworth has supported minimum wage increases, retirement and wage increases and fringe benefits for federal employees, better social security coverage and payments.

Harris Ellsworth was author of the bill to establish the Veterans' Domiciliary at Camp White and has worked for improved veterans' hospitals facilities and better veterans benefits.

Ellsworth aided developments of a second payroll industry in Oregon by securing location of the Bureau of Mines Electro-metallurgical Laboratory at Albany where new process for use of low-grade ores have brought about new mining and metal industries in the 4th District.

Congressman Ellsworth has introduced legislation for and supported flood control, power projects, access roads, hospital, power distribution facilities, harbor improvements and other improvements by federal agencies on which more than \$200,000,000 has been expended.

ELLSWORTH NAMED ON NATO DELEGATION by Speaker RAYBURN

Congressman Harris Ellsworth (R-Oregon) has been named as one of nine members of the U.S. House of Representatives to represent the United States at a meeting in France Nov. 19th of parliamentary delegates from the North Atlantic Treaty Organization countries. This honor was conferred upon Congressman Ellsworth by Speaker of the House, Sam Rayburn (D-Texas).
