RAIL BOARD ASKED TO ANNUL AGREEMENT

Western Roads Declare Wage Settlement Would Make Increased Rates Necessary.

Chicago.—A committee of managers of western railroads will file with the United States rail labor board a petition asking that the board annul an agreement entered into December 16 by the Southern Pacific system and its engineers and firemen by which the men were granted an increase in wages.

The petition alleges that the decision was forced upon the railroad "under threat of an interruption of transportation," and declares that "other railways may also be forced, in order to avoid interruption of transportation service, to make similar settlements." The petition further sets forth that the settlement directly tends to make necessary an advance in railway rates in western territory.

The managers call attention to an order of the board dated November 29 covering the dispute between most of the western railroads and the Brotherhood of Locomotive Engineers and Brotherhood of Locomotive Fireman and Enginemen, by which the board awarded an increase of about 6 per cent in wages but made this increase conditional upon modification of working conditions and rules which the railways contended were restrictive and unnecessarily increased operating expenses.

The committee says that the Southern Pacific settlement was made without reference to changes in rules as provided in the decision of November 29.

PROHIBITION CHIEF APOLOGIZES FOR RAID

Portland, Or.—George L. Cleaver, state prohibition commissioner, who led a raid on the British vessel London Merchant, seizing a quantity of the ship's liquor, and who was charged by the federal government with illegal search and seizure, returned all liquor seized.

Following the return he handed Captain Anderson of the vessel a letter of apology in which he admitted that he had made the raid "under a mistaken view of his own powers" and that he had no evidence of any law violation aboard the vessel.

International complications loomed when it was found that Cleaver's unauthorized raid had violated the treaty with England which was made last May, and known as the 12-mile treaty.

BASIN FUND IS VOTED

House Passes Bill Extending Time for Columbia Project.

Washington, D. C.—A resolution by Senator Jones of Washington making the appropriation for investigation of the Columbia basin project available after January was finally passed by both houses Saturday, after being amended in the house to limit the time to February 15. Jones stated that the report is expected to be ready by the middle of January or first of February at the latest.

Senator McNary proposed to attach an amendment authorizing the use of about \$6000 left over from the Umatilla Rapids project appropriation for further inquiry on that project, but withdrew it after Jones had expressed fear that this would complicate matters. McNary will ask that this be done in another bill, with a view to further examination of the feasibility of irrigating some of the lower level lands excluded in the report of the engineer.

Courtship is probably so called because it gets many a man into court.

It is reported at Salem that Governor Pierce has under advisement a proposal to include in his message to the legislature a recommendation that the state printing office be operated in connection with the state penitentiary. Under the governor's plan convicts would be instructed in the printing profession, and only such free labor as is necessary would be employed.

Nayberger's Great January Clearance Sale

Is being attended by hundreds of customers from every part of the county and adjacent territory. There is a reason—our sales are genuine, and the public knows from past years that when we advertise our January sale, it means a great saving. Especially this month, we are making the greatest effort to reduce our stock, that we have ever made, as it is much too large in every department. Our entire stock of clothing, ladies' ready-to-wear, shoes, dry goods, fancy foods, and our Cash Bargain Basement Store, are all included in this sale, at a reduction in prices from 20 to 50%.

Thanks

We are grateful to our many patrons for their generous support and custom in 1924 and sincerely hope the conduct of our business in the past will merit a continuation of your regard and consideration in 1925. It is our endeavor to conduct the business of your lighting company in a manner to justify public respect, having in mind at all times the adequacy of service, reliability in its delivery, and a studious effort to maintain it 365 days of the year. During the recent storm and prevailing unusual weather conditions we had but one general service interruption and are happy to say our customers sustained no inconvenience.

We are thankful beyond our words to express our deep appreciation for your patronage and extend our cordial sincere greetings for a Happy and prosperous New Year.

Dr. A. C. Schmitt of O. A. C. Injured.
Albany, Or.—Dr. A. C. Schmitt, instructor in the school of business administration at the Oregon Agricultural college and formerly president of the First National bank at Albany, was seriously injured in an automobile accident on the Albany-Corvallis road, two miles from Albany.

Addition of six cement ponds at the hatchery of the state fish commission at Bonneville will bring the capacity up to 10,500,000 fish, and make it one of the two largest hatcheries in the world, according to Hugh C. Mitchell, state superintendent of hatcheries. Work on the new ponds has been started.
