Chiropractic For Bronchitis

By nerve tracing, a physical examination used by Chiropractors only, tenderness can be traced from the place of impingement (pinching) at the spine to the region over the Bronchial Tubes. This assists the Chiropractor in locating the exact cause of the bronchitis which, when removed, produces health and normal function of the respiratory organs. Numerous cases of Bronchitis have completely recovered under chiropractic spinal adjustments. Acute cases usually require but a short series of daily adjustments, while chronic cases will require a longer time, depending upon the severity of the case, the length of its standing and the responsiveness of the patient's vitality. Consultation and spinal analysis free.
