AEROPLANE FIELD PROPOSAL WILL BE LAUNCHED AT BANQUET TABLE

At the next regular meeting of the Delake Chamber of Commerce which will be held Monday evening, a banquet and fine program will be given to its members. The banquet will be given in celebration of the first anniversary of the chamber and also of the Beach Resort News. A few invited guests will be present from Portland and our immediate locality.

The evening's program will consist not only of a birthday celebration, but it will also mark the birth of another big project which will be formally launched at that time. For several months the Delake Chamber has been working on the idea of establishing an aeroplane and hynroplane landing field. This idea has now taken form and is ready to be set in motion.

The President of the chamber together with the editor of the News, has been in touch with the officers of the State Aero Club of Oregon which is affiliated with the United States Aero Club, and arrangements have been made with this organization for a committee of their membership to meet with the Delake Chamber Monday afternoon and evening. If the weather will permit, there will be at least one plane in from Portland and possibly several. The planes will arrive shortly after noon and will land on the beach. Their occupants will be the guests of the Chamber and will spend the afternoon inspecting the proposed landing field site, and will address the Chamber Monday evening on the feasibility of establishing a landing field here.

Authorities who have been conferred with, who have flown their planes to the beaches, have informed us that the Salmon river passage to the ocean is the most practical and efficient air route along the coast from the valley to the beach. We are in-

formed that this will certainly become one of the main air routes, if not the only one which will extend the great Columbia river gorge airway from Portland to the sea. The very low altitude of the mountains from New Grand Ronde to the Salmon river valley and thence on to the ocean, makes this an ideal pass to the coast from the East. It is only a matter of a short time until this route will be generally used by the ever increasing number of those who fly. The Roosevelt highway route will be followed by aeroplanes in the future. A landing field must be established at Delake.

The banquet Monday evening will be served promptly at 6:30 after which round table talks will be heard and a general program will be put on. Arrangements are being made for a most enjoyable and profitable evening.

MYRENE GOES ON BAR AT TAFT

Considerable excitement was caused at Taft Saturday by the log-towing tugs. The Myrene went down the river to the bar with a raft of logs closely followed by the Dodeca and the Geo. F. Brown, also with log rafts. When the Myrene undertook to make the turn over the bar, she and her raft went onto the sand and became grounded. The pilot of the Dodeca was unable to stop his raft, being so near the Myrene, so did a splendid piece of piloting work and took his raft on by the Myrene and safely over the bar. The third tug was far enough behind so she could stop her raft and go to the assistance of Myrene, which was pulled safely off the beach. The feat performed by the Dodeca pilot was a very difficult one and he deserves great credit for his efficiency as a pilot.
