

PASSING SHOW

Gives Trench Concert in Italy

Corp. T. Gallacher, at the organ. Seated at the console of a captured organ in a trench in Italy the corporal is about to begin an impromptu entertainment for the English Tommies seen with him. Just 800 yards from the soldiers' position another concert—shellfire—is being given for the Italians by the British Fifth army.

Admirals Tour Green Island

Admiral William F. Halsey, USN, commander of the South Pacific forces of the U. S. fleet, chats with Vice Admiral A. W. Fitch, commander of aircraft in that area, as they pause on inspection journey of Green island. This island is 120 miles from Rabaul bastion, which is being pounded by U. S. forces from time to time. Steel helmeted Rear Admiral R. B. Carney is seated in rear of jeep.

Stump Didn't 'Stump' This Play

Hy Gotkin (12) of St. John's (Brooklyn) dribbles down the court with Gene Stump (92) of De Paul (Chicago) in hot pursuit to "stump" him. Action took place at Madison Square Garden in New York where Flatbush eagres trounced Windy City five to cop top honors in National Invitation basketball tournament for second successive year.

Royal Couple

Helsinki Haven

Continual bombings by Russian planes have taught Helsinkiers there is no safe place outside the air-raid shelter. Here two young girls who make it a habit to sleep in the shelter are bedded down for the night. They bundle up with every kind of available clothing in order to keep snug.

Beam Tipper

No, this young fellow isn't throwing his weight around. He's just making sure he gets an accurate reading from the scale. This camera portrait was made by Carl Mansfield of Bloomingdale, Ohio. It was an entry in the 31st annual exhibit of the Pittsburgh (Pa.) Salon of Photographic Art being held in that city.

AROUND THE HOUSE

The oven should be hot for baking vegetables and the baking time should be just long enough for them to become tender but remain firm.

Pans in which milk has been heated are cleaned easier, if they are rinsed before and after using, in cold water.

Old horseshoes, filed to wedge shaped points on one end and drilled and bolted to your ladder, make sturdy hooks for use on the roof ridge.

Keeping shoes polished keeps the leather pliable and preserves it.

For pulling basting threads keep a pair of sharp-pointed tweezers in the machine drawer. These work more effectively than a pin, scissors, or even your fingers in pulling out the basting.

If the radiator fins on your car or tractor get bent, try straightening them with a common table fork, the prongs of which have been cut down to about one-fourth inch length.

ON THE HOME FRONT

With RUTH WYETH SPEARS

THESE graceful corner shelves are ten inches wide and seven inches deep at the bottom. Just the right size to hold the quaint match holder, the old-fashioned china doll head and other interesting trinkets that you have been treasuring. In Victorian times such shelves were strung together with cord and the spools saved from the voluminous amount of sewing done each season. Today, with spools piling up from

Red Cross sewing, we make similar shelves that have all the old charm but are much more rigid and substantial.

The spools and shelves now may be practically welded together with new easy-to-use types of glue. The wire or cord is then run through, as shown here, so that the shelves may be hung in a corner ready to hold articles of considerable weight.

NOTE—Mrs. Spears has designed an actual-size pattern for these three gracefully curved corner shelves which are graduated in size. This pattern also contains complete directions for cutting and joining these shelves as well as a pattern for another larger set of spool shelves. Ask for pattern No. 255 and enclose 15 cents. Paiche, 500-Pound Edible Fish, Being Raised in Peru

One of the largest fresh-water fishes in the world, the paiche, or pirarucu, 12 to 15 feet long and weighing up to 500 pounds, is now being raised commercially on a fish farm in Peru.

Dried and prepared in long strips, the flesh from the monster fish was the poor man's "beef" in the Amazon region for years.

Once it was so plentiful that fishermen from one small village could count a two-week catch by the thousand. Unrestricted fishing almost depleted the waters, so Peru has established a hatchery to replenish them.
