

Chart for Calculating Quantum of Indian Blood

Blood degree shown in shaded area is less than 1/8.

Note: All denominators for lower part of scale are 64. "N-I" stands for non-Indian. To determine degree of blood of children, find degree of one parent in left hand column and of the other parent in top row. Read horizontally to right and vertically below to find the proper degree. Example: Child of parents, one 11/16 and the other 5/8 would be 21/32 degree.

As you can see, in August of this year, we had only 13 full blood enrolled Tribal members left, 132 with a blood quantum of 1/2, 403 at 1/4, and 547 (approximately 25%) at 1/8. Those with a blood quantum of 1/8 who marry a non-tribal member cannot enroll their children in the Tribe under the present requirements.
