

A Message to the Employees of the State of Oregon

If you should be sick or injured your life may depend on the kind of medical and hospital treatment you receive. At such times, those of you who are members of the National Hospital Association know that no expense will be spared in furnishing you with whatever services your conditions require . . . If operations are found necessary they will be furnished; if specialists are needed they will be provided. X-rays, laboratory tests, blood transfusions, blood plasma, ambulance services, special nurses, oxygen, radium—these and other recognized services are all furnished under National Hospital Association Contracts—and wherever the member wishes to obtain them.

Moreover, the doctors and hospitals who attend national members receive proper pay for their services—the Association does not ask special rates or discounts.

The National Hospital Association operates on the fundamental American principle of free enterprise and fair play. It maintains a capital and surplus sufficient to discharge its obligations. It is not doctor-owned or doctor-controlled and does not claim to be a non-profit organization.

The National Hospital Association is proud of its record—it is proud of its distinction of being the founder of prepaid medical and hospital care in America. We shall be pleased to send literature to you and your friends. Let us explain our new contracts for your families.

National Hospital Association
