

Building a Future

THE BRILLIANT FUTURE OF THE WEST was made possible by the foresight of the American pioneer who forged courageously through the wilderness, alert to the hazards of the trail and prepared to meet them.

Today that same quality is needed to build your future—foresight to plan ahead and prepare to meet the hazards which may threaten your security. Not the least of these are sickness and injury. Are you prepared for them; able to provide vitally necessary medical and hospital care immediately when it may be needed? Will sickness or accident in your home mean serious financial difficulties?

There is one sound, business-like and inexpensive solution to this problem—the

National Hospital Association plan for prepaid Medical and Hospital Security. Under this plan, individuals or families are assured of COMPLETE medical and hospital care when sick or injured, wherever they may be. Services to members of the Association include care by the member's own physician, hospital care, services of specialists, X-rays, special nursing, ambulance services and the many other costly facilities of modern medical science.

Since 1906, the National Hospital Association has pioneered in the field of prepaid medicine. Safeguard your future by taking advantage of this **world-wide** plan for the protection of your health, your home, your income. Send the coupon for full information.
