

ability to secure an appropriate state teachers' certificate at time of appointment. Examination: At present time there is no examination given for this class. Position vacancies are filled by the state institutions from applications of interested persons.

Secondary Teacher \$2760 - 3480

Requirements: College graduation with specialization in education and ability to secure an appropriate state teacher's certificate at time of appointment. Examination: At present there is no examination for this class. Position vacancies are filled by the state institutions from applications of interested persons.

Spring Activities in Oregon's Snow Heights

The Travel Information Department of the Oregon State Highway Commission announces the following winter sports events which may be of interest to our sports-minded membership.

Hoodoo ski bowl at the Santiam Highway summit will be the scene for the all Oregon downhill and slalom races for junior boys and girls March 27, sponsored by the Obsidians. Race courses at Hoodoo range up to 50 per cent grades.

A big jumping meet is set for eastern Oregon's Anthony Lakes ski area March 27 for classes A, B, junior and senior open. This is one of Oregon's more recently developed snow sports sections.

The Far West Kandahar, offering downhill and slalom races, class A invitational, for men and women will be held April 3 at Mt. Hood, sponsored by the Cascade ski club, attracting entrants from distant points.

On April 17 the Portland junior chamber of commerce is sponsoring the Golden Poles races at Mt. Hood. A giant slalom for classes A and B will be featured.

Oregon's competitive ski season will reach its June climax with the

Golden Rose ski tournament on Mt. Hood above Timberline Lodge on June 12th. This annual event closes the Portland rose festival which opens on June 8. Attending the Golden Rose tourney will be the rose festival queen and court, rulers of the mythical realm of Rosaria, which is Portland during festival week.

Of Men and Snow; Surveyors Battle Elements

By Ballard Brooks

During the past winter months, the construction survey party, located in Baker, has been battling the most severe weather conditions seen in many years. While doing location work in Ladd Canyon, the party has fought against temperatures that have ranged as low as 38 degrees below zero and winds which, at least on one occasion, have approached 40 M.P.H. Snow drifts are frequently encountered which are fully 12 feet deep and the average depth of the drifts is approximately 8 ft. These conditions often make travel difficult if not impossible and the boys have, more than once, walked more than a mile to their work.

Although working conditions are severe, humor is present. While taking Cross-Sections one cold day, Owen Seamen fell through the crust which had formed on a snowdrift of considerable depth. Owen all but disappeared from sight and, being very much overburdened with the heaviest of winter clothing, could do nothing but flounder. Finally realizing he was helpless, he called for help. Ernie Swiger and Jim May came to his rescue and pulled him out.

One January day the party was running "L" line in a field which lay adjacent to a country road. The road was being opened so that feed could be hauled to a herd of Elk that were wintering in the area. When the snowplow, a D-4 "Cat" equipped with an angle dozer, came along, the operator saw the plight the boys were in as they pushed their way through 2½
