MAN WITH A RULE

A typical law school student one day took his first case to court. Looking sternly at the witness he asked, "How close were you to the place the accident occurred?"

"Fifty-three feet and three and one-half inches," answered the witness.

"How can you say so exactly?" inquired the surprised lawyer.

"Well, I thought some fool would ask me a question like that, so I measured it."

The most difficult part of getting to the top of the ladder is getting through the crowd at the bottom.—Arch Ward.
