

Accent is on People . . .

SOCIAL ACTIVITIES play a large part in assisting the patient in his program of reconstitution. This personal relationship therapy is very helpful to the patient's "desire" factor. Mrs. Janice Joseph, staff member, leads the group in a fast round of "Hokey-Pokey."

INDUSTRIAL THERAPY provides patient-help in kitchen and dining activities. Appetizing foods are prepared and served under supervision of the Dietary Staff, three of whom are shown here: Miss Henrietta Bear, Food Service Supervisor; R. E. Becker, Cook; and Mrs. Eva Gerber, Dining Room Manager.

OCCUPATIONAL THERAPY staff meetings are held weekly for training and communication purposes. They include demonstrations, book-article review, case studies and informal discussion of programs and procedures.

STAFF PSYCHIATRIST, Adolfs Lietuvietis, listens as his patient explains a physical ailment.

ACCURATE AND COMPLETE

records on every patient admitted are carefully maintained. Keeping complete records provides continuity to a patient's care. Since the first admission in 1883, over 45,031 case records have been compiled on 17,976 female and 27,055 male patients. Shown L. to R. are Alice Strawn; Adele McHale, Records Librarian; Myrtle Jarvis and Arlene Tanner.
