

Working together we protect services for seniors and people with disabilities

Throughout this Legislative session, Homecare members participated in Lobby Days, town hall meetings, rallies, letter writing, and phone calls to urge support for services for our clients, and a training fund for homecare workers. The threat to provider choice for clients was pushed off. Threats to cap the number of homecare clients enrolled in the program were defeated. SEIU members, clients, and community coalition groups share in these victories.

“I always worried that politicians went to Salem and forgot where they came from. Going to town hall meetings with other homecare workers gave me the chance to remind my legislators why they are there.”

Jennifer Snyder

Homecare worker, Cottage Grove
