"Chocolate creams" was the topic for discussion at a meeting of the senior industrial chemistry class on Saturday evening. Prof. O. F. Stafford gave a more practical turn to the hitherto theoretical consideration of the properties of sugar, by assisting the class in the preparation of some delicious fondant and coating it with a tempting brown covering. About eight pounds of candy were made. Following the shaping of the last brown cone, Prof. Stafford gave the regular lecture. The fact that the candy was made according to strict chemical formula and by exact scientific methods did not detract from its tooth-someness. A small portion of it was filled with Ivory Soap, bits of tube and corks for the purpose of free distribution among the gullible.

Carl Davis, '05, is ill with typhoid fever at Missoula, Montana and will probably come home to Eugene as soon as he is able to travel. He went to Montana to help Dr. Ricketter of Chicago University investigate the nature of the mysterious Rocky Mountain Spotted Fever which is peculiar to that locality. Soon after arriving at Missoula he was taken ill.

Earl Strong, manager of Tennis, has posted rules governing the preliminaries to choose Oregon's representatives at the Seattle tournament. The contest will all be singles. A nominal fee of fifty cents will be charged from each person entering the tryout.

H. J. Rounds went to Elmira Saturday.

## ENGINEERING CLUB MEETING

(Continued from Page 1.)

ing. Shall Oregon offer a five year course leading to the degree of C. E.?

The tendency at present is to make the engineer the executive officer of his company. This will become more common in the future. He must know how to plan the policy of his company and hence a man with more than an engineering education is required.
