

The sixth division pupils are working examples estimating the cost of plastering and papering rooms.

How I wish that just enough snow could fall to carpet the earth for a little while.

Who was it that wished it would snow whenever you get their wish. It is snowing a little today for the first this year.

There has been an addition of nine volumes to the library of the Self-Helping History Club. Now for a wholesome immersion into the past.

Very soon will we miss Miss Landman, and her sweet music, but we wish her "God's speed" in her new undertaking and may wherever she goes, where she goes, with her music as she has often here.

It is far from being a matter of being set free from any, when we prison constraints or those are to lose. A little five year old boy could perform that wonderful act as well as the young man who is 18 or 20 years old.

Teachers (in Geography) "Who can give me another name for sterility?"

Manual Replies: "Thermometer."

Now the teacher wants to know if Mattie has any relation to the Settler who said that "A turquoise mine is a place where turkeys are buried."

Erk Woods spoke with much expression Wednesday night and the effect of the high playing tops, which was rendered by Ole Larsen, during the recitation of her recitation "The Old Year and the New" was wonderful although some persons who has no much business or poetry in his soul did "more."

The Usuals Indians call Indian boys who are away from school "robbers," a very good name for them. A boy is a one around, certainly busy fellow too history in work and transportation the country decided by every one. The Indian boy who goes away from school where he gets no schooling, board and education free is a fool, not a big one too. No it is a cowardly and stupid act, and the really brave, smart, and honest boy would not be guilty of such weakness and foolishness.

It doesn't pay to run away.

Mrs. Carlisle is able to be out of bed.

Bert McCrea, one of our printers is on the sick list.

Messrs. Gillis and Knight, poet and orator of class of '92 were visitors at the printing office yesterday.

The pupils of the seventh division are tussling with examples in estimating the number of bricks required for brick building.

French was the subject for nature study this week in room number seven.

The "parade" Thursday noon was watched with much interest and attention by all students and employees. The banners displayed were to the point and original.

Probably some of our Indian School friends at Phoenix AZ., will have a chance to sample something good and strong that comes from Chawawa, as our boys are now loading a car, for shipment to that point, of the onions which were on the school farm.

Willie Blodgett is busy making out tickets for the voters of the seventh division. We understand there is to be an interesting election held there in a few days. Willie says he would know how to vote any where now. This is good, practical work and we are sure the seventh division will be glad to experience.

John Harris entertained the fifth division with a very good story on Monday evening at study hour. John is rapidly acquiring an excellent vocabulary by the way he picks about in details and is always willing to express his thoughts to others. He is not afraid of being corrected but realizes that that is the way to learn.

How Ey one of Carlisle's staunch pillars has invented a new word. "Behag-piveness." It is certainly a good one, and implies that those who do not take-up, and grasp their opportunities will fail in the battle of life. There is no gain, self-satisfaction in this world, and too many are afflicted with it to ever take-up and succeed.
