Mrs. Spitzbart of the Fair Grounds visited the school last Monday for her first time. She said that she was surprised to see such a large institution and that she was among drawn again some beautiful day and look through the different departments of the school.

Just as we go to press James Smith met with what might have been a serious affair. He was driving the Flyer, to the two-wheeled hook, around the corner of the fence, a little down grade, to keep them from getting scared at a freight train. When he turned the corner these two boys came unbidden which frightened the team and they made a dash forward which turned the six over and smashed it considerably. James considers himself lucky as he did not even get a scratch.
