

Industrial Notes.

Toad Foster has entered the Engineer and Plumber's Department.

The Blacksmith shop has just finished shoeing all of the school farm horses.

The painters are now at work on the water tower giving it its second coat of white lead.

James Smith has entered the Engineer's Department to master the mysteries of electric lighting, steam heating and plumbing.

Wesley Moon has charge of a fire in the Blacksmith shop, and is making good progress at his work. It falls to his lot to do a great deal of the school repainting.

Edward Brown is going to be a very good blacksmith. Mr. Martin says that he has to him the making of a good blacksmith, and all that he has to do is to stick to it.

The work of improvement goes merrily on. The Gymnasium is now on wheels going to its new location and the ground is now cleared for the new boys' dormitory.

Mr. Hill and his firm are now working on the roof of the new rest house and are putting it hurriedly to completion in order to clear out large crop of income which is now being gathered.

A large force of boys have been busy digging ditches for the sewer, water and water connections for the office in its new location. This consumed a great deal of additional work, which is hurriedly being pushed to completion.

The carpenters set up a new porch and show at the office to-day. The building looks very well in its new location, being raised higher on its foundation and the circumstances in which it is placed gives it a very picturesque appearance.

Mr. William Jorgens who do so well in his school work and especially in his trade is now carrying on his trade as baker in the Capital City. And I am sure we are all sure that pleased to learn that this young

man has followed his trade to the mark.

The mousetrap around and in front of the Administration building has been under laid with water pipes for sprinkling purposes. Much has been sprayed and now it will be plowed, leveled and sown with blue grass and white clover. The entire campus will be thus treated.

Ed. Green is the latest addition to the bakery. That is right boys keep a running, the bakery can hold you all. Bread baked in the dining hall is of big forces each meal. Clifford Cronquist is doing really well in pastry work. Joe Charles is a good steady and a hard worker, and if he sticks to it long enough will make a baker.

Domestic Science.

We are glad to welcome Miss Jane Evans back in the sewing room.

Brook Siegel and Jessie Hymington have fifty pairs of rolled curtains for the Methodist Hall.

The little boys look very neat in their new shirt waives made in the sewing room by Miss Mary Doman.

Mrs. Westfall is sending the prison of Mr. Furrows' beautiful cat "Coco" who is chasing the mice away from the Thaumetococcus quarters.

Has anyone been to the Hospital and sampled Miss Della Wiggins' sweet hints-to-pleasure? Duke is a good all round home knifer.

The Dairy.

Mr. Godwin, Dairyman, says that the milk at present is not very plentiful, and the pastureage is short on account of lack of rain. He says that in order to get good milk, it is necessary to give the cows plenty of good fresh water, and this they get at Chemawa. That the cows respond quickly to good, kind, regular treatment, as it is very necessary that our boys should be taught to be always prompt and to be kind and gentle to the stock. This he hopes to teach the boys, so that our milk pails will be full to overflowing to the best future.
