Last evening many eyes at Chumawa were turned towards the heavens to see the total eclipse of the moon, the view of which was not obstructed owing to a cloudless sky. The moon entered the earth's shadow at exactly 8:50 o'clock and the total eclipse began at 9:10 p.m. The total eclipse ended at 9:30 and the moon left the shadow at 10:40 p.m. It was a very beautiful and impressive sight.
