

School Room Notes.

Miss Dixon's school room looks very nice, as the put up some very pretty pictures.

Lesson "Boston says," that little boy was trying to make the best writer of the school grade this year.

"We sleep in her hair!" said one of the little ladies girls as she saw her teacher smiling unconsciously to himself.

We hope that some boys will take pity on Robert Hanson, and give the slack grade, as he is the only boy.

With Winter says, "We had a job for those money (Tuesday). Willie Johnson was able to get his, and I was too."

It is a pretty good idea a boy is to request when he asks his teacher for a book to take home to study something. Well there are some of that kind here in Chemawa.

"How do the little girls do now a little bit?" "Don't know," was called out by one of the little ones. A few minutes later the fat spotted hamster was spirited away by the little boys.

The "Baby Class" in three weeks, has learned to read, write, and spell fifteen words, and to recognize them anywhere they written or printed. Also the number positions through five. Harry Christensen's have the proverbial "Dull Town."

As on Nov. 3, we just by the fall, and school year has changed its appearance during the last week. Bright and attractive garden has under the walls, with blackberry nearly harvested and the windows filled with potted plants, these gardens can be fairly proud of their fruit.

The teacher and pupils of the receding grade are more than pleased to have the presence of Miss Irene Flaxgård. Her large character and gentle manner help much in smoothing the rugged pathway to the college. She will some day be an exceptionally good kindergarten. "Teacher we're not made."

The Dairy and Farm.

A couple of fresh cows this week. enough home milk.

The sheep feed for the dairy has arrived, now look out for the milk.

The Farmer boys have done a few pieces of work fertilizing the beds in front and around the office, putting thirteen 45 loads of fertilizer.

As soon as the beds around the ground can be plowed, they will level the lawn, and sow it in timothy grass and white clover. This work will be extended over the entire school campus.

Frank Christie says, "I have kept working on the farm ever since I have been at Chemawa and I like farming better than any other work, because I like the farmer as well, and I think I will be a good farmer when I get home. I will be able to work my farm with out a farmer, but I will always remember the good old farmer Mr. Childers, at Chemawa when I leave the school."

Football Notes.

The next week we will be able to give our football schedule.

Captain Palmer has interest in his own, (the, etc., for his legs and now they can't sleep even at the other tables in the dining room on the day, etc.

Hard practice is what will assist boys, get plenty of exercise, shoveling gravel, putting stumps and then study the rules and you will pull out alright.

Chemawa expects this to be one of the best football years. While our team will not be as heavy as formerly. Captain Palmer says that if the boys will only get in and practice that they can play quick enough ball.

Alfred Pagan, (Dr.) Seifert and Richard Sandnes have given us permission to arrange a Riverside's football aggression. Thus does the reputation of Chemawa extend. We can spare them and only hope that they will be a credit to Riverside Athletics.
