

Industrial Notes.

Miss Moon is taking lessons in shirt making and is doing very well.

Turnstone Williams has been added to the staff in the Blacksmith Shop.

Charles Cooper, son of our industrial teacher, has entered the tailor shop as an apprentice.

Frank Currier and Ned Charles were employed by Mr. Treator to assist in moving the office and commissary.

Gene Daigne is working on the second floor of the Olive building, and some one else who keeps it clean.

The Indians are now to be gathered and put away. We have a fine crop. The farmers have just finished building about 10 tons of straw and placed it in the barn.

The Blacksmith Shop has just finished sharpening and repairing all of the plows and harrows for the farmers and gardeners, and are now hard at work making three wagon boxes for hauling gravel.

Mr. Woods, Carpenter, is Chemsaw's Surveyor. He has been kept quite busy the past week in addition to his regular work, surveying the stream and sewer ditches and leveling and squaring the office and commissary as they were being moved to their new locations.

Mr. Moon says he intends that his blacksmith boys shall be able by the end of the year to make some articles ornamental enough to send to the Fair. The blacksmith boys are taking a great deal of interest in their work. After school is out, they come over and work until the whistle blows.

On account of the press of outside work and the exceptionally good fall weather we are having at this time, the wagon boys have been called on to assist the carpenters. Mr. Hill with his crew and Mr. Grolwin and a detail of carpenter boys are hard at work building the new root house. The rafting and skidding are now on, and by the time the readers of next week's AMERICAN get their paper, it will be skinged and ready for the large crop of Chemsaw's onions and potatoes.

The tailor boys are kept quite busy these days making private suits. Since Sept. 1st, they have made suits for Mr. Chas. Henderson, Superintendent (Chas. H. Mr. H. Henderson and now have suits in hand for Mr. Donald Campbell, Mr. Herbert Campbell and the Editor of the AMERICAN. Nicholas Lewis, Neel Schuchtha and Aaron Amthor are doing the work and besides gaining practical knowledge which will prove to be of great value to them when they are out in the world on their own resources, are earning money, which, if it were not only a secondary consideration but is encouraging just the same. Henry Contran refused to work in the tailor shop on the 15th inst. Henry will make a good tailor if he will keep up his record of last year.

The Chemsaw studio always has on hand a beautiful assortment of Photo Albums and Picture Frames. They also do as good, if not the best, Photo-graphic work as any Photo-graph studio in Salem.

PROPOSALS FOR SEWER AND DRAINAGE SYSTEM. Department of the Interior Office of Indian Affairs, Washington, D. C. Oct. 11th, 1902. SEALED PROPOSALS enclosed.
