

CHEMAWA'S HOSPITAL.

Built in 1890.

Chemawa's Hospital was built in 1890 but a second story was added in 1900. It is beautifully located and has a lovely lawn and flowers which bloom nearly the whole year round. Roses are in bloom at Chemawa from early May until Christmas and sometimes later.

Chemawa has been exceptionally fortunate the past six years in having very little sickness at the school, considering the large number of pupils enrolled. This is largely due to good sanitation and an improved vegetable and fruit diet.

Each ward of the Hospital is supplied with bath, toilet and wash rooms and the wide porches in front are a great pleasure for convalescents.
