THE LAUNDRY.

The school laundry was built this spring and is one of the best equipped laundries in the service.

It is provided with steam washers, mangle and wringers, shirt-collar and cuff ironers, the motive power of which is an electric motor and the mangle is done with electric irons. It is thoroughly equipped with dry rooms, etc., and in addition with tubs, etc., in order that the instruction can be given pupils in this most important work of the house wife.

On page 2 of this issue, we give interior views of the wash and ironing rooms.
