

#### SCHOOL BARN AND HERD.

The school herd is rapidly improving and we anticipate in the near future to be able to tell our readers that the milk supply has been doubled in the last six months.

We are establishing a temporary dairy until we can have an up-to-date dairy. Under Mr. Godwin's able management this will be accomplished.

Last Wednesday Mr. Godwin gave the student body an excellent address on milking; the care of the cows; making butter, etc., but we have not the space for it this week. We will give a synopsis of it next week.
