

BASKET BALL.

The basket ball game in the gymnasium this Friday evening between a team from Albany and the Chemawa girls' team resulted in a victory for the latter by a score of 14 to 3.

The game was a clean one from start to finish, no rough playing being indulged in by either side.

In the first half our girls scored four baskets from the field and threw two on foul, while the Albany girls only scored one on a foul. In the second half Chemawa threw two baskets from the field, and Albany scored two points on fouls.

After the game the visitors and spectators joined in a social dance and the balance of the evening in a very delightful manner.

The Albany girls spoke very highly of the hospitality accorded them and expressed themselves as having had a most delightful time. They departed on the 10:30 overland.

The Ernie Roberts read the following program at the last meeting.

| | |
|-----------------------|----------------------------|
| Music | Annie Hayes |
| Recitation | Sadie Davis |
| Song | Clara D. Pease |
| Picture | Martha Decker |
| Reading | Ruth Barrett |
| Comical Reading | Bessie Bolen |
| Song | Lena Charles and Lena Sisk |
| Recitation | May Evans |
| Recitation | Agnes M. Cerkendale |
| Riddles | Alice Sisk. |

The minister of a rural parish having neglected to pray for rain in a time of drought, a deputation was appointed to wait upon him and remonstrate with him on the subject. After hearing what they had to say, he replied, "Well, well, I'll pray for rain to please ye, but the feint a drap ye'll get till the change o' the moon."

Industrial Notes.

James Arquette is making a full set of wrenches for the engineers, and when he gets them finished it will be as nice a piece of work as can be turned out in any blacksmith shop.

Silas Moon is making tools for the new forges now being built.

Jefferson Wilson has advanced in his work so well that he now does most of the horse shoeing for the school.

The blacksmith apprentices say, "Send in your orders for blacksmithing. We can make anything that can be made out of iron."

The blacksmith boys have commenced ironing off two new wagons and expect to have them finished in two weeks.

Merle Poland and Thomas McCutty are taking in the order of the all the tools in the blacksmith shop and marking the same.

Daniel Oaks has been added to the bakery detail.

Guy Howard has just completed a wheelbarrow especially for the use of the large boys here, for hauling away the sweepings and scraps of paper.

Joe Davis is also making a wheelbarrow, but has not yet decided who will get the benefit of its use.

George Olney has his hand in making wagon tongues and poles. He repaired one that was broken out of the light farm wagon last week, and is now engaged in making a new one out and out for the new wagon gear.

Sebastian La Chesta is gaining valuable experience putting in new hind bolster in one of the farm trucks.

Bring in your work and have it done on short notice and at the lowest possible rates.

We wagon-makers will have to hurry now to get out work for the blacksmiths by the time they have their four new fires ready for operation.
