

## Industrial News.

### The Paint Shop.

Arthur Murray, a new pupil, has been detailed to the Paint Shop and is proving himself to be a cool and industrious boy.

Robert Davis makes a good foreman when placed in charge of a job of painting. He does neat work himself and likes to see the boys with him do the same.

The painters oiled the new floor in the sewing room the first of the week.

### Our Musicians.

Anyone can notice the difference in a hand after close application to practice and drilling in the band room.

A piece of music cannot be rendered so well that it cannot be done better by practicing.

The band concert last Sunday evening, in honor of Chief Justice F. A. Moore, was much enjoyed by all who heard it. The boys also marched over to the hospital and rendered a few selections, much to the delight of the inmates.

### Dairytag Department.

We are anxiously waiting and watching for the green grass to come so that will increase our milk supply; as it is we get nearly fifty gallons a day but with good grass for the cows we should get seventy five gallons.

Our new boys from Montana are rapidly becoming proficient milkers, and between times while we are resting, as it were, we do a little dental work; extracting stumps and roots north of the school house.

We are sorry that it was necessary to leave out a handful of interesting matter this week on account of its late arrival at the office. We would be pleased to have all copy handed in by Wednesday noon, if possible, so it has all time to go to press Friday forenoon.

## Pacific Coast Institute.

The Pacific Coast Indian Institute will be held at Newport August 5th to 12th, inclusive, and every indication points to the institute being a record breaker in the history of local institutes. Already we have received numerous letters from all over the service, showing that the attendance will be larger this year than last.

It is the desire of those in charge of the institute that the industrial features of the Indian school work be brought to the best and superintendents and employees be urged to send industrial exhibits, especially to this institute, showing up the work of their schools along the industrial line.

Those who attended last year speak in the highest terms of the scenic beauty of Newport.

### Grace Jones.

The cook "panned" out.  
The tailor "kicked" over.  
The postman "fold" to rest.  
The engineer "strained" up.  
The gardener gave to "seed."  
The tailor's "goose" was cooked.  
The foot-ball player "kicked" out.  
The base-ball player "fanned" out.  
The shoemaker breathed his "last."  
A few aphorisms expressed no fact:  
The onion eater gave up his "scent."  
The printer has his "form" locked up.

### Pleased With Chemawa.

CHEMAWA, ORE., March 22, 1906.  
Mr. Jimmie Reed,  
Salt Water, Calif.

DEAR FRIEND:—How are you getting along? I am getting along all right so far. I wish you was up here, we would have a good time. I took a long walk yesterday and two of my friends went with me and we had a good time down to the river, we all took a swim. Well I am working on the girls old home hanging doors. This long job, it will take me some time to get through. They have started a new home for boys.

From your friend,  
STAN MITCHELL.
