

## Industrial Notes.

The strawberries are in bloom and in need of some sunshine.

The farmers are making good headway in cleaning land.

Martin Wallan and John Finkbonner are back in the engine room again.

The farmers were busy last Friday and Saturday fixing the fence back of the industrial building.

Geo. Washoe and Sam Morris, of the engineer's department are named among the sick this week.

The farmers have just finished sewing eight acres of clover in the west field and are now plowing a twenty-acre patch for potatoes on the east side.

Mr. Cooper's force of boys are doing some good work on the west side of the commissary, in filling up the big excavation formerly located there. The place will be leveled off and made into a lawn.

### Blacksmith Department.

The blacksmiths have just finished ironing two trucks for the commissary.

Frank Sorhan, who came from California about two months ago and entered the blacksmith shop, is learning very fast. He now does a great deal of the repairing and horse-shoeing.

Frank Pipion, one of new apprentices in the shop, is learning the trade rapidly.

Chester Bell is on the sick list, but we hope to see him back in the shop soon.

Silas Meeker is working at the forge with James Arquette. They are ironing off wagons and doing good work.

Thos. McCully is making hardies and chisels for his new forge.

### The Carpenter Shop.

The carpenters have nine tables under construction for the laundry.

Chas. Newton is making a neat bolt-rack for the blacksmith shop.

A force of carpenters are at work in the commissary putting in new shelves and widening the old ones.

Mr. Woods had a part of his force busy first of the week putting in new glass in the windows of the large boys' dormitory.

The lumber has arrived for girls' dress boxes in McBride Hall. The carpenters will begin work on them this week.

The carpenters have nine tables under construction for the laundry.

Chas. Newton is making a nest bolt rack for the blacksmith shop.

A force of carpenters are at work and the commissary putting in new shelving in widening the old ones.

The box for moulding the corner stone for the new dormitory, constructed by the carpenters, is highly spoken of by Mr. Erixon, who has the work in charge. The letters are due to Mr. Woodin's handiwork.

Carpenters are kept busy this week repairing furniture in the large boys' home.

### Domestic Science Notes.

The girls are delighted to have the cooking classes started again.

The Domestic Science classes are very proud of their new tables and other work done for them by carpenters the past week.

Lena Briguone made those nice cookies on Wednesday last.

We promised not to tell who praised Laura Reed's pies.

Twenty-seven little chickens were hatched in the poultry yard last Monday.

One of the incubators was started with a full capacity of 200 eggs on Tuesday.

Mr. Overman received a setting of Plymouth Rock and Wyandotte eggs from J. C. Murry of Portland Tuesday. They will be used for next years' stock.

Mr. Mann and his apprentices have taken out the partition between the blacksmith shop and the old wagon shop. The blacksmith shop is now 40 feet wide by 80 feet long with seven fires.
