

claim that the water can be cut off and transferred to the new service at different points without stopping the supply in any of the rooms for more than a few moments at a time. They have proven themselves equal to the occasion.

The extension of water pipes, putting in new hydrants and improving the water system in general has occupied the attention of the engineers this week.

A water pipe was laid in front of the laundry to furnish water for the rose garden. We expect to see some beautiful roses in Mrs. Brewer's garden this summer.

The engineers replaced the spray in the south room of the laundry Tuesday.

Martin Wallan, of the engineer's force, proved himself to be quite a "tumbler" Monday afternoon. Seeing two boys at work painting the butcher shop he concluded that he could run a paint brush as easily as an engine, and was soon up on the staging "dobbing" it on. Success was too much for Martin and he quickly developed that big feeling which has caused the downfall of many others, when the staging, not equal to the sudden increase of weight, gave way. There was a lively mixup for a moment with the boys slightly in the lead and a touch-down in sight, but the paint-buckets proved a good second and all landed in a heap, with the paint on top. The little buckets of paint were not very formidable looking objects but they made those three strapping boys turn white very quickly.

Carpenter Shop Notes.

More lattice work and stakes are being made for the roses.

The carpenters now have in hand 59 screens for doors and windows for the hospital.

Preparations are being made to add an annex to the gymnasium to be used as a milk and butter house.

"Siberian Political Exiles," in the College Barometer is very good. The last number of Barometer contained several good pieces.

Bakery Items.

El Green, a good worker in the shop, left Monday to work for private parties. The bakers wish him all kinds of success and hope he will have a small sum of "tin" in his pocket when he returns.

Joe Charles made some very nice cake for the sociable Tuesday evening.

Improve Your Nature.

If you would increase your happiness and prolong your life, forget your neighbor's faults. Forget the slander you have heard. Forget the temptations. Forget the fault-finding and give a little thought to the cause which provoked it. Forget peculiarities of your friends, and only remember the good points which make you fond of them. Forget all the personal quarrels or histories you may have heard by accident, and which, if repeated, would seem a thousand times worse than they are. Blot out as far as possible all the disagreeables of life; they will come, but they grow larger when you remember them, and the constant thought of the act of meanness, or worse still, malice, will only tend to make you more familiar with them. Obliterate every thing disagreeable from yesterday; start out with a clean sheet for to-day, and write upon it for sweet memory's sake only those things which are lovely and lovable.—Reformatory Record.

Pupil Items.

Cora Richardson will work in the domestic science next week.

Cora Richardson has made herself a pretty summer dress.

The snow balls that Jane Evans planted are growing very nicely.

Frank Sorahan came back and is now working on Mitchell Hall.

Addie Saylor made some very nice cookies Tuesday morning.

The way the men are working on the Mitchell Hall is not very slow.
