

supplies power for the laundry and other shops as well as lights for the buildings and grounds.

The grounds are divided into several parts, including the farm, dairy, orchard, garden and poultry yard, which supplies fresh milk, butter, eggs, vegetables and various fruits to the school kitchen.

SOME OF THE NEW BUILDINGS.

The school building is a large two story brick, built at a cost of \$15,000. It contains 10 class rooms, an office, library, and a large assembly hall with a seating capacity of 600. Nine teachers are employed and all the regular grammar grade studies are taught.

The laundry—a large \$5000 brick structure—is a source of pride to the school and is one of the best equipped laundries in the service. It is furnished with the latest and most modern machinery, all of which is run by electrical power.

The new brick Industrial Trades Building furnishes spacious rooms for the tailors, dressmakers, harnessmakers, shoemakers, wagonmakers and carpenters. The building was constructed at a cost of \$8,000. Each room is well lighted, warm and has good ventilation. Other industries, including the printing, blacksmithing, Engineering, Plumbing, baking, painting, etc., occupy commodious quarters in other buildings.

THE HOSPITAL.

The hospital is under the charge of Dr. E. A. Pierce, a member of the State Board of Health and one of the best physicians in Oregon. The Doctor gives his closest attention to the health of the Indian children at the school.

LOVELY HOMES FOR THE PUPILS.

Mitchell Hall, the large boys' new home, is a magnificent brick structure built at a cost of \$25,000, and is now receiving the finishing touches and will
