The Multnomahs walked off the grid-iron with our scalps hanging to their belts last Saturday afternoon. Our boys were defeated but not disheartened. The score stood 15 to 5, which is a good showing when considering that the victors greatly outweighed our team, and they have easily defeated all other teams on the coast. The Poriland papers spoke very highly of the game put up by our boys and spoke at length on the plays made by Sanders and Teabo. Our next game will be played with the Astoria team.

Mr. Overman's address before the school on the subject of "Poultry" one night last week was very interesting, coming, as it did, from one who thoroughly understands the business. Mr. Overman brought out some statistics that were surprising to one who had never looked into the poultry business, stating, among other things, that the poultry industry amounted to \$300,000,000 in the United States alone during the past year, which is equal to the wheat output. Poultry, he said, is surpassed only by dairying, combined with all animals slaughtered, beef, etc. The egg output amounts to \$150,000,000. Chicago alone consuming 300,000,000 eggs daily. During the course of his talk he explained the operation of the incubator, and how it should be used to obtain the best results.
