

PUPILS' ITEMS

Wood, wood, was the cry from every house last Monday morning.—T. H.

We are sorry that little Nellie Sander-son died as she was a great favorite among the girls.

Fred Lewis is learning his trade very fast and he is a very good worker. He is a very good brick layer.—F. B.

Mr. Burdette conducted the funeral services which were held in the chapel on Saturday morning.—A. M. L.

Henry Nelson has been promoted to the sixth grade Jan. 14th and we hope he will enjoy his school work.—W. B.

Throughout the country there is a coal and wood famine. We pupils ought to be thankful here and think of those who need fuel to keep them warm.—E. W.

The second basketball team was defeated by South Salem last Saturday. The spectators say that was the cleanest game played this season on the Y. M. C. A. floor.—G. W.

It hardly ever freezes hard enough at Chemawa to skate but when it does a good many pupils want to borrow skates but they seem quite hard to get here at school.—C. L. D.

Georgie Deer was a visitor of the small girls last Monday evening. Georgie went on the third floor to see if the girls were all safe. Georgie is Miss Troutman's favorite.—M. D.

Charles and Clarence Bardwell, accompanied by their father left for their home in Washington state, last Friday morning. Their many school-mates shook hands with them and bade them a reluctant good-by.—W. H. H.

The thermometer registered at a freezing point in the "Potato house" last Tuesday night, so Mr. Westley put a heating stove there in order that the potatoes may be saved for the school. He called on his two reliable boys Jack Upham and Philip Sooksoit to keep up the fire all night.—B. W.

We should be thankful that we are not like the people of Portland and other cities suffering for the want of coal and wood. We should consider ourselves lucky, even if we do have to go to bed to keep warm occasionally. We know that the steam will come into the radiators in a few hours.—J. D.

Joe Dillstrom brought a new magazine to school called the "Pandex." We know that "Pandex" means "All the news." "Pan" means "All" and "dex" the news. NO! we are not studying foreign language at Chemawa; but when we do happen on a new word we have curiosity enough to look it up even if we are Stolid Indians.

When in the course of human events it becomes necessary for the weather man at Portland to dissolve his unnecessary likings for testing our endurance for cold weather. We, the pupils of this institution in order to form a more perfect union and friendship with the afore said weather man, insure more warm weather, so we may be able to study harder, ought to respectfully petition him and ask him remove this cold weather to another part of the country.—P. J. S.

Do you know why it snows so much this year? it is because we are moved 70 miles north by the earthquake of San Francisco.—W. M. If this is true there will be no need of explorers to find the north pole. A couple of earthquake will land us in the open polar sea.
