A New Orleans paper tells of a printer who, when his fellows went out to drink beer during working hours, put in the bank the exact amount which he would have spent if he had gone out to drink with them. He kept to his resolution for five years. He then examined his bank account, and found that he had on deposit \$521.85. In the five years he had not lost one day from ill health. Four or five of his fellow-workmen had in the meantime become drunkards, were worthless as workmen, and discharged. The water drinker bought a printing office, went on enlarging business, and in twenty years from the time he began to put by his money, was worth one hundred thousand dollars.—Selected.

His life hung in the balance for four or five days, but good care and the doctors' skill have accomplished their end and he is at present doing so well that his complete recovery seems to be but a matter of a very short time.—The New Era.

One of the employees while "sprucing up" for lunch at the club, was standing before the mirror, and discovering some sawdust on his shoulders, commenced to blow vigorously at the mirror to blow the dust off.
