

exception, will be worthily represented. The committee has decided to award testimonials to special meritorious exhibits. These testimonials will take the form of medals, diplomas or money prizes. Several \$1000 awards are offered.

"The publications will be printed in German, French, Spanish and English. Preparations were set in motion in Oregon by the action of Governor Chamberlain by appointing 17 delegates to the congress. Governor Hughes of New York, requested the Governmental departments to co-operate in the preparation of a suitable exhibit. Most of the states are putting forth an effort to secure exhibits, and enlisting as large a membership as possible.

"The congress has appointed a committee of awards, numbering 85, of which the Countess of Aberdeen, of Dublin, Ireland, is a member. This great convocation will prove of the greatest educational value. The fact is fully recognized that education of the masses alone can solve the problem for the control of this dreaded disease.

"The physicians who can possibly do so should visit Washington during the meeting. Those that cannot do so should secure the publications, which will comprise about 2000 pages, composing four substantial volumes. These volumes will be free to all who are members. The list is open to laymen as well as the medical profession. Active members are entitled to all of the privileges by paying a fee of \$5. The associate members pay a fee of \$2.

"I trust that Oregon will be well represented, and that a large number of volumes of these transactions will be distributed among the people as an educational factor."

## Chemawa Goes Ahead.

nificent and there is a roomy gallery circling the entire building.

Another building is a two-story implement house. Here will be stored all the farm tools and implements when not in use. Here wagons, rakes, plows, harrows, etc., will be sheltered from the rain of winter or the summer sunshine when not doing service in their particular capacity. This was a much-needed building and in time will more than pay for itself in many ways.

Another building that is being remodeled is what at one time was the old printing office. A portion of this structure will be used for families while the remainder will be utilized as a bachelors' quarters. This, too, had become a necessity.

Perhaps one of the greatest, if not the greatest, undertakings of the year is the construction and erection of an open-air sanitarium. This will consist of 16 wards, eight for girls and a like number for boys. This is particularly intended for the occupancy of those who are in need of the fresh air treatment, as science has proved that many are benefitted by liberal potions of light and fresh air. This enterprise is progressing nicely and all who take an interest in conditions here must feel pleasure in the knowledge that such a great work is nearing completion at Chemawa.

There are many improvements other than those above-mentioned in progress in Chemawa, but they will serve as the basis for a future article.
