

instructors may be correlated and adapted to the immediate and practical needs of the Indian. There will also be round-table conferences and an exhibit of class-room and industrial work, as well as of native arts and crafts.

N. E. A. state headquarters will be established at the various hotels, where employees may meet teachers from their home state. Where persons are isolated for so large a part of their time, as is the case with employees in the Service, nothing is so beneficial to the betterment of their work as contact with their fellow workers and free and hearty interchange of opinion and discussion of results of past work and plans for the future.

Aside from the educational benefits derived from these meetings, the recreation resorts in the vicinity of Denver, the magnificent Colorado scenery, the delightful climate, together with the special railroad rate, offer strong inducements for a large attendance. The Pacific Coast Institute will be held at Seattle, Washington, the latter part of August, but the exact date has not been announced.

A pinch of soda, put in green vegetables while they are boiling, acts like magic. It makes string beans deliciously tender; it keeps the fine color of spring peas, while a more generous pinch performs a miracle for cabbage, causing it to cook in about half the usual time, and keeping it as fresh and green as when it came from the garden.
