LIVE ITEMS.

The campus this week looked as pretty and as neat as at any time this season.

Shingles for the new roof at the gym. are here and work will soon be in progress shingling the same.

A fire alarm system has been received at the school and will soon be installed in all of the principal buildings of the school.

The football season will soon be here. Last year's squad is published in this paper. Many of the squad will be here this fall for the line-up.

Freight supplies continue to come in car load lots and are stored in the Commissary which is very full of a fine line of supplies for the present year.

Chemawa will be represented at the Institute by Superintendent Chalcraft, Mr. and Mrs. E. A. Smith, Mr. Turney, Mrs. Theisz, Miss Royer and possibly one or two other employes of the school.

The Teachers' Club dining room has been floored with linoleum which adds to the appearance of the same. In the near future, the hall and bath room of the club will be similarly decorated.

The pupils are now enjoying new corn from Chemawa's garden. Mr. Westley reports that this year he has a larger supply of this succulent vegetable than ever before in the history of the school.

The new "Shoninger" Grand Piano has arrived and now graces the school chapel being used for the first time at Father Datin's service on Sunday morning. Dolly Case presided. This makes our musicians happy.

Miss Irene Campbell has returned from The Breakers where she attended an invitation tournament last week. She reports having had a delightful outing and reached the finals in ladies' doubles and in the mixed doubles.

This year's potato crop will be a record breaker. On account of the dry spring, our gardeners put in a few acres more than ordinary of tubers but weather conditions so changed that present indications point to a very large crop, so that our potato bins will be full to overflowing this winter.

An annunciator system has been obtained and will soon be installed at the hospital and open air sanitarium so that every bed will be connected with the central office and the wants of patients made known. This will be a great help and convenience in our hospital department.

Authority has been received for the replastering of the large boys' dormitory of which the plastering was very defective. By the time our next paper reaches our readers, work in this building will be under way. It will be replastered throughout with hard wall plaster.
