

## PUPILS' ITEMS

Joe Gardepi says he will be a farmer when he leaves Chemawa.

Irving Shepard says he will make a good base ball player this year.

The painters have painted a number of "Keep on walks" signs.

John Ammon is still working in the carpenter shop. He is doing well.

Ellen Tohet makes delicious pies. She is the best piemaker in the hospital.

The Blacksmiths were glad of the party after their hard game with the All-Stars.

The small boys tied the small tailors by the score of 2 to 2 in a game of basketball.

We farmers are now discing and seeding west of the school and will soon be through.

The flowers are beginning to bloom out in the woods. That is a sure sign of Spring.

Bennett Reed and McGraw Kahama are the two latest additions to the painters' detail.

Matilda John is doing fine in her music. Matilda says she will be in the 3rd grade soon.

I think we will have a good many flowers this year. The boys are fixing the rose bushes.

Some of the girls helped to weed in Mrs. Chalcraft's flower garden and she treated them with taffy.

Every morning Harry Stone can be seen training for the annual Salem-Portland relay-race. Harry will represent the printing department.

These fine mornings Fred Choquett can be seen running before breakfast. He is training for the 50-mile relay race between Salem and Portland.

Chas. E. Larsen has purchased \$10 worth of new music for the band and in a short time the public will hear some new pieces played during the fine spring evenings.

## MODERN STICK.

We have at present thirty-eight boys and young men working in the engineering and plumbing department with intentions of taking a full course. All of these young men are capable of learning the trade, as they are trustworthy, honest, and willing to work. The opportunity to master this trade is greater than ever. Our plant is larger, has modern equipment, and as the days go by the outside work at plumbing, steam fitting and electrical work increases.

We anticipate a change in our electrical department when a large dynamo, which is on the road to Chemawa, will replace the largest generator we have at present. Chemawa is growing, growing, growing, consequently its right arm is growing also.

Here is a chance for any young man to learn a valuable trade. Grasp the opportunity—be a "modern stick" and stick to it until you have accomplished the necessary requirements to qualify you for a worthy position after leaving school.

Joe Moss, the youngster, who is thirteen years old, is just as useful around the power house as Albert Meacum or Martin Sampson, two young men who are taking up the post-graduate course.

It might be news to state that we are generating enough electricity and steam day and night, to meet the needs of Chemawa, which is large enough to be a town itself, and have time to cook our night lunch besides. "When is the party coming off?" seems to be the question in consideration, while the latest news is that "Oregon" (Eugene Anderson) has been put through the miller. However, we hope that he is not booked for the cannery, as he is a great factor in the plant. We wish him success.

AN ENGINEER.
