DOMESTIC SCIENCE NOTES.

One reason why the little girls enjoy their meals in the domestic science is because they always have such nice bread.

The little housekeepers in the domestic science, Rena Feliz and Callista Rainville, thinks that one of their most valuable lessons learned the past detail is to put every article used back in its proper place when no longer needed. It is to be hoped they will never forget it.

PUPILS ITEMS.

This is All Fools' Day.

We are all enjoying this nice spring weather.

Alice Stanger, who has been helping Miss Skipton plant flower beds in front of the Dining Hall, does her work so well and takes such an interest in it that Miss Skipton says she is very proud of her.

Ellen Tobet, one of the best hospital cooks, treated many of her friends at McBride Hall with beautiful colored eggs on Easter Sunday; on some of the eggs were rabbits and chickens; while others were only decorated in many beautiful colors. We thank her for the eggs.

Peter Bushman deserves great credit for the Morris chair which he has just completed this week. One has to really see it to appreciate fully the workmanship. Beside the actual experience which he is now getting in the cabinet shop, he is also taking by mail a mechanical drawing course from the International School.
