

LOCALS

An electric cabinet has been secured for the proper caring of our half-tones.

Mr. Ralph Weddle has been appointed station agent to succeed Miss Condit, who was promoted and transferred to Marion.

Emily and Joe Moss left for their home at Polson, Mont., yesterday on account of the serious illness of their mother.

The Estelle Reel Society will hold an annual picnic tomorrow afternoon in "Old Chemawa" instead of having an evening party.

The game of ball with the St. Paul team for Wednesday was cancelled on account of rain. St. Paul has a fast bunch of ball tossers.

It is a pleasure these days to go into Mitchell Hall and enjoy the pleasant environments of the place. McBride Hall had better look out for its laurels.

Mrs. Smith had the misfortune to lose some very valuable papers, fortunately she will lose nothing financially, although she spent a couple of sleepless nights.

The Cabinet makers, after completing 125 tables for the dormitories, are now at work on 110 tables for the dining room. These latter are nearly all made and ready for use.

Miss Brown has improved the appearance of things around the domestic science building. Everything looks ship shape and neat. Flowers of all kinds will be blooming there presently.

At the Reliance sociable last evening we failed to see the Excelsior colors which had been won by the former society. Upon inquiry we learned that the Excelsiors failed to deliver the goods. In the past "Excelsior" in society circles stood for good sport. We hope they will still keep up their good name. A good loser is the best kind of a sport.

Our ball team will play Willamette University today at Chemawa; Mt.

Angel College here on the 14th and a return game at Mt. Angel on the 18th, and Dallas College at Dallas June 8th.

Mr. Chalcraft's angora goat has been sheared of his fleece and been placed in other quarters away from the deer so that the latter can have the benefit of the brush that grow in the enclosure.

The windmill is a great acquisition for Chemawa. It does not burn any wood and then when "Old Boreas" blows we are sure of water in the early morn. "He" never forgets to turn on the valves in the morning.

Mr. Frank Willman of Salem made a short visit yesterday at the school, and inspected the tennis courts. Mr. Willman promises that he will again grace our courts this spring. This is good news for our tennis enthusiasts.

The plans for remodeling the Small Boys' Home are well under way. This building needs a complete overhauling, and if the plans contemplated can be consummated our small boys will have a very much better home the coming years.

The kale that was planted in February is nearly ready for transplanting. This was our best forage crop the past year and our dairy force promise that this will take still another step forward and give us still better results from kale the coming season.

The roses that have been placed around the cottages occupied by Messrs. Woods, Swaboda, Van Tassel, Frye, Mann are all doing nicely and give promise of having some bloom this season. About 500 roses were placed about these cottages this spring by these progressive employees.

The relay race boys must get down to work if we expect to repeat our victories of the past three years. The Portland Y. M. C. A. team are making extra efforts to win this year's race while some of our boys seem to think that we have them defeated without systematic training. We won before by regular training and that is the only way we can win. Now boys get in and go to work and sustain the honor and colors of "Old Chemawa."
