BEAR HUNTERS' MISTAKE.

A telegram from St. Colomban des Villas, in the Savoy, reports that the villagers were thrown into a state of great alarm by the appearance of a large bear on the edge of the village. It was looking for something to eat, and a general raid by the animal on all the live stock in the place was feared.

The men sallied forth to hunt the bear and the women locked themselves and the children in the houses. After a time the bear was surrounded and shot as he was trotting up to the men. The intrepid hunters dragged the carcass to the village and skinned it, distributing portions of the skin as souvenirs of the adventure and dividing the flesh for home consumption.

Great rejoicings were going on when the owner of the bear arrived, and on hearing of the fate of his pet stated that it was a pet performing animal, and that he would sue the village for compensation for the loss of his means of livelihood.—Ex.
