On Wednesday evening of this week the dairy detail, under Mr. Cooper, took possession of the rostrum in the academic building and gave various demonstrations of interest and educational value relative to dairy matters. Many tests were given and there were exhibits of more than ordinary interest. In order to make the subject matter of even greater interest, a feature of the evening was an investigation tour of Mr. and Mrs. Backwoods, a well-meaning but ill-informed old couple. All together it was an evening well spent and creditable to all who took part.
