WOOD ASHES MOST VALUABLE
Those Produced by Burning Hardwoods Like Hickory or Oak Contain Much Potash.
The use of coal ashes is permissible on heavy clay soils. However, they should be screened and all coarse cinders removed before being applied, and then should be spread evenly over the surface and thoroughly mixed with the soil as deep as it is plowed or spaded. Coal ashes have little value as fertilizer, their use being mainly to loosen the soil and make it more workable. Wood ashes, especially those produced by burning hardwoods like hickory, maple, or oak, frequently contain as high as 7 per cent potash, and are valuable fertilizers. Those produced from burning soft woods, such as pine, and also hardwood ashes that have been exposed to the weather, have comparatively little value as fertilizer. About 50 pounds of dry, unbleached hardwood ashes may be applied to a plot of ground 30 by 90 feet in size, but should be well mixed with the soil.

PEAS REQUIRE MUCH SPACE
Smooth Varieties May Be Sown Early or as Soon as Ground is in Shape to Work.
Peas are not adapted to growing in very small gardens, as they require much space. Most gardeners, however, insist upon having a few short rows of peas in their gardens. In large gardens enough peas should be planted to provide surplus for canning. The smooth varieties may be sown very early or just as soon as the ground is in shape to work in the spring. The wrinkled varieties should not be sown until the ground has warmed slightly. Some of the dwarf varieties that the larger growing sorts require brush, a wire trellis or some form of support. The old-fashioned English sugar pea on good soil will grow to a height of 5 or 6 feet and produce peas until midsummer. It should be borne in mind that under ordinary conditions peas do not withstand great heat, and that they must produce their crop before midsummer. —United States Department of Agriculture.

KEEP FOWLS FROM FREEZING
Prevent Trouble With Combs and Wattles By Anointing With Vaseline and Kerosene.
Frozen combs and wattles of chickens may be prevented by anointing with a salve made of equal parts of vaseline and kerosene, well mixed. Apply this at night during very cold weather. Put it on thick in cases where the combs and wattles are already frozen. This salve is also excellent for colds in the head or rattling in the throat. Rub the salve over the nostrils and under the throat.

Overhaul Poultry House.
At some convenient time of the year give the poultry house and yard an exceptionally thorough cleaning and disinfecting. If a dirt floor is used, dig down six or eight inches, cart the dirt to the field, and replace it with clean gravel.

Proper Feed for Boar.
The boar should have sufficient food to keep him growing rapidly and in good flesh, but not such foods as are likely to make him fat.

HORSES, MULES BOUGHT, SOLD
U. S. STABLES, 385 Union Ave. Draft horses bought and sold.

Dr. Chas. M. Anderson, Denton, Portland.
Wedding Bouquets and Funeral Pieces
Lubliner Florists, 248 Morrison St.

"Sporting One's Oak."
"To sport one's oak" is a phrase signifying that one is not at home with visitors. The saying originated at the English universities, where the students' chambers have two doors—an inner and an outer one. The outer door is made of oak, and when this is closed or "sported" it denotes either that the occupant of the apartment is out or that he does not wish to be disturbed.

To Remove Lead in a Gunbarrel.
Chemically pure and strong nitric acid will dissolve the lead and not attack the metal of a gunbarrel unless the acid becomes diluted with a little water. To remove the acid, pour all of it out and wipe the gun dry with a rag soaked in olive or cotton seed oil. Do not get the acid on the hands or clothing. If, by chance, this happens, wash it off immediately with water and then with some weak alkali.

Heroic Poem.
There is no life of a man faithfully recorded but is a heroic poem of its sort, rimed and unrimed.—Caryle.

The Originals.
Adam and Eve were the first people to put too much confidence in their family tree.

Garden Note.
The easiest way to remove weeds, Robert, is to marry a widow.

Tides Dispose of Sewage.
In Boston and many other coast cities the tides are utilized in the disposal of sewage, part of which is held in reservoirs until strong outgoing tidal currents have developed. Before the turn of the tide the sewage has been carried so far that it has become mixed with an immense body of ocean water and is rendered harmless.

Better'n an Ice Wagon.
When two little Irish boys asked a woman in an electric machine for a ride, she looked into the upturned dirty faces and couldn't resist. While driving to the street they had designated they sat perfectly still with eyes focused straight ahead, but when they got out she heard one say: "Gee, that's better'n ridin' a ice wagon, ain't it?"

Worth Remembering.
The joy unshared loses half its sweetness, and the grief borne alone doubles its bitterness. We were not meant for solitude but for sharing and when we are enjoined to love our neighbor, it is for self-preservation as well as for helpfulness.

Pursue Happiness Too Strenuously.
We all seek happiness so eagerly that in the pursuit we often lose that joyous sense of existence and those quiet daily pleasures, the value of which our pride alone prevents us from acknowledging.

Mount Hecla's Many Outbreaks.
There have been 28 eruptions of Mount Hecla, the famous Iceland volcano, since the discovery of the island.

A SWEET LITTLE BABY BOY
Makes a Bright Spot in Every Home. A Comfort in Years to Come

Park Rapids, Minnesota.—"I have taken your medicine—Lydia E. Pinkham's Vegetable Compound—when I was a girl for pains and before and after my marriage. I now have a sweet little baby boy and will send you his picture if you wish to publish it. My sisters also take your medicine and find it a great help, and I recommend it to those who suffer before their babies are born." —Mrs. Wm. Johnson, Box 156, Park Rapids, Minn.

To marry and arrive at middle age without children is a great disappointment to many women. Think of the joy and comfort other women have in their children as they grow older.

Lydia E. Pinkham's Vegetable Compound has helped to bring great happiness to many families by restoring women to health. Often the childless woman is due to a run down condition of the wife, which may be helped by Lydia E. Pinkham's Vegetable Compound. It brought health and happiness into the home of Mrs. Johnson. Why not to yours?

Whist, played as long ago as 1500, was originally called "triumph."

A child of two and a half years should have sufficient teeth to masticate solid food, say many doctors.

The people who have the best eyesight, as a rule, are those who are mostly employed in the open air.

In the United States there are 235,518 miles of railroad in operation, exclusive of double tracks and sidings.

FARMERS URGED TO RAISE GEESE AS FOWLS FURNISH TABLE MEAT

(Prepared by the United States Department of Agriculture)
During the holiday season, when the unctuous goose graces the largest available platter, is the time to think of the advisability of growing a bunch of these profitable birds for the tables that will be spread for hungry families another year. The goose population in the United States has been on the decline in recent years, but the United States Department of Agriculture expresses the opinion that there are many farms on which a few can be raised on pasture and other feed that will scarcely be missed. Although the demand for feathers is not what it once was, and the eggs are not in demand for cooking, these birds are worth while as producers of delicious meat. The objection has been raised that the meat is too oily, but this condition is largely due to improper cooking, to failure to remove the surplus fat of the abdominal cavity, and to not skinning off the grease while cooking.

Geese Need Little Feed Outside of Pasture During Greater Part of Year.
Geese are desirable on many farms where there is no such market. Except in winter and during stormy weather, mature geese have little need for a house. Breeders in the North, and some in the South, use a shed open to the south as a protection in winter. Coops, barrels or other shelter are needed by goslings. The houses may be kept clean by supplying plenty of straw for bedding.

Feeding the Young Birds.
Goslings do not feed until they are 24 to 36 hours old, when they may be fed any of the mash recommended for chickens or for ducklings, or a mash of dough of two-thirds shorts or middlings and one-third corn meal, which after six weeks may be made equal parts shorts and corn meal and 5 per cent beef scrap. Bread and milk is also an excellent feed for goslings. Fine grit is needed and may be provided by using 5 per cent of sharp sand in the mash, or by keeping it before them in a hopper.

Birds' Homing Instinct.
The homing instinct in migrating birds consists of their wonderful ability to detect changes in climate and the direction of the compass, for their "home" may cover a large area. The rest is all accomplished by the observation of landmarks.

Winds Have Various Names.
Several hundred local names of winds are in use in various parts of the world.

Strained Music.
The organist at Gloucester cathedral declares that the present vogue of wearing hair-over-the-ears is responsible for a lot of poor singing. His opinion is open to criticism, but it is generally admitted that it would be better if some singers wore the hair over their mouths instead.—Eve (London).

The Instrument known as the radio-
micrometer is so sensitive that it will measure the heat from a hand held thirty feet away from it and will record the heat given off by a fixed star so remote that light from it, traveling at a speed of 186,000 miles a second, takes many years to reach us.

RHEUMATISM
Cannot exist in the human body if you will use Trunk's Prescription. It is ridiculous and preposterous, in fact it is a pity and a shame to suffer with inflammatory, muscular, sciatic or any form of rheumatism. For information write Trunk Bros. Drug Co., Denver, Colo.

Are You Satisfied?
BEHNKE-WALKER BUSINESS COLLEGE is the biggest, most perfectly equipped west. Fit yourself for a higher position secured our strength. Permanent positions. Write for catalog—Fourth and Yamhill, Portland.

Good for valuable premiums

WINDING GEMS.
I have observed that butterflies—very broad-winged and magnificent butterflies—frequently come on board of the salt-ship, where I am at work. What have these bright strangers to do on Long wharf, where there are no flowers nor any green thing—nothing but brick storehouses, stone piers, black ships, and the bustle of toil—some men, who neither look up to the blue sky, nor take note of these wandering gems of the air?

A Dutch concert is a so-called concert
in which every man sings his own song at the same time that his neighbor is also singing his, a practice not necessarily so national as convivial. There is another form of Dutch concert in which each person sings in turn one verse of any song he pleases, some well-known chorus being used as a burden after each verse. When every person has sung, all sing their respective songs simultaneously as a grand finale.

Blondes Disappear in Three Decades.
The real blonde types disappear within three generations when transported to the tropical regions. In the course of time it is predicted by an ethnological expert that the people of the United States and Australia will all be dark.

A great boon to smokers, relieving hot, dry mouth.

Combines pleasure and benefit.

Don't miss the joy of the new WRIGLEY'S P-K—the sugar-coated peppermint tid bit!

Good for valuable premiums

Gates in a Roman Camp.
The "praetorian gate" was the name of the front gate in a Roman camp. It was always the gate that faced the enemy. Every Roman camp had four gates. The "decuman gate" was opposite to the praetorian gate, and was the farthest from the enemy. The gates on the right and left sides of the camp were called respectively the porta principalis dextra and the porta principalis sinistra.

Incorporated Business.
An incorporated business is one that is owned by a corporation, as distinguished from one owned by an individual or a partnership of individuals. In an incorporated business liability for debts extends only to the property owned by the corporation, whereas an individual doing business in his own name is responsible to the full amount of his possessions.

Rare Gift.
The scent smeller is as essential to perfume manufacturers as the tea taster is to the tea merchant. The gift of scent smelling is a thousand times more rare than the gift of wine sampling.—Indianapolis News.

Name Differently Applied.
The name "daddy longlegs" is applied in the United States to creatures closely related to spiders, while in England it is given to the crane flies.

Birds' Homing Instinct.
The homing instinct in migrating birds consists of their wonderful ability to detect changes in climate and the direction of the compass, for their "home" may cover a large area. The rest is all accomplished by the observation of landmarks.
