THE TURNER TRIBUNE

3. B. Bowley, Editor

Issued Every Thursday at Turner, Marion County, Oregon

SUBSCRIPTION \$1.25 PER YEAR. Entered at the Postoffice at Turner, Oregon, as second-class matter, under the Act of March 3, 1879.

at Turner, Oregon, as second-class matter, under the Act of March 3, 1879.

There is a proposed constitutional amendment to come before the voters of the state sponsored by the so-called Housewives Council under the heading "Water and Power Development." It provides for the state to purchase water power plants or develop new ones. It will mean, if carried, the saddling on to the already over burdened state, another load ling, Fred Straw and Mary L. Straw and saddling on to the already over burdened state, another load of taxation to be borne by the people of the state of Oregon. by which execution I am commanded to sell the property in said execution It all sounds very nice for the state to own these industries. But when it comes to paying for them, that is a different story, sum due the plaintiff of \$1200.00 with But when it comes to paying for them, that is a different story.

There may be instances where publicly owned utilities have been successful but the history generally over the country has been that they have proven to be unprofitable. Even the Post fees, and the further sum of \$150.00 attornsy's fees, and the further sum of \$355.68 Office Department, one of the greatest government owned institutions in the country, has never paid its way. The cities and states over the country who have owned these utilities and states over the country who have owned these utilities are the country who have owned the country who have owned the country who have owned these utilities are the country who have owned the country who have owne and states over the country who have or had a bursements of said suit taxed at are selling them out to private operators because of the expense of operation. The people of the state of Oregon would said execution. I will on Satur do well to investigate thoroughly before voting on a measure the 27th day of February, 1926. of this kind.

REAL PROPERTY ON FOL.

Too Ambitious

There are massive locomotives now being built that cost more than \$100,-900 each and yet some fool driver of a motorcur thinks he can push one of them off at a crossing.-Los Arigeles

BABIES and children, the same as adults, grow weary of being fed the same food in the same way each day. It is true that most children take naturally to milk, but that does not mean that they must be fed it ad nauseam. On the contrary, that is the very thing to be avoided.

Pediatricians advise consumption by hildren of a quart of milk a day in one form or another. This does not mean skim milk, but whole milk, for the skimmed product is lacking both in butter fat and the essential food. County, State of Oregon, duly made element known as vitamin A, which is and entered on the 30th day of Janfound in butter fat. Many mothers uary, 1926, the undersigned was apfound in butter fat. Many mothers cream from the top of a bottle of rafik results in skim mik,

In evaporated mlik, a product rec nmended by many leading doctors for the use of infants and children and which is simply pure cow's milk sterilized in cans and with sixty per cent of the water removed, there no cream line. The milk in the ton of a can is the same as it is in the bottom of the container, homogeneous suspension. Every drop of homogenized milk has a buttery taste because it contains butter fat For this reason, in evaporated milk, there is none of the flat taste one finds in drinking from the bottom of a bottle of market milk.

In osler to avoid feeding the baby or child plain milk three or four times a day, many authorities recommend the use of a mixture of fruit luice and rafik, a highly palatable and refresh-

Following is a recipe worked out by experts for an orange-milk drink; Mix in a fruit jar % of a cupful of orange juice, 1/4 of a cupful of evanorated milk, three tenspoonfuls of sugar, 1/2 teaspoonful of lemon Julee and a few grains of sait. Shake well before serving.

FARM REMINDERS

Experiments with methods of mak-Oregon, as a Republican candidate ing manure from straw, carried on at for Vice President in 1928. His the Oregon experiment station, are progressing well. The departments minent members of the upper house of soils and bacteriology are cooper-

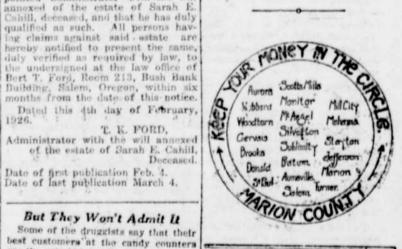

by Senator Stanfield, after there had ating in this work. The potato movement has slowed up to some extent and while prices remain about the same the demand is not strong and the market seems a

Barley for seed is beginning to atfor another six-year term at the last tract some attention and is held at general election, in November, 1924. around \$40 to \$45 a ton, depending He is a member of a large number in part on its quality and whether or of committees which are beneficial to not it is recleaned. The need for Oregon's interest. Chief among them barley in western Oregon for lives his holding the chairmanship of stock and poultry feeding is still very he Irrigation and Reclamation Com- pronounced, and growers often lay in mittee, which is all powerful in the a good supply of Hannchen barley west. Senator McNary was born and seed before the feeders use it up.

Pastures in the Willamette valley Referring to the rumor that a movement is on foot for the nomina- for finishing, early lambs or for sustion of Nicholas Longworth for the taining the milk flow of dairy cows presidency in 1928, Senator Stan-field bays concerning Senator Mc-Sheep were maintained on the irrigaciated with my colleague, Scnator ted pastures at the Oregon experiment station at a cost of 1 and 3-4 McNary, for many years and have cents per head per day in the last dry season.

The grain market continues to be rather slow. Large exports have takn place since the last radio report ad more wheat is going out from Portland in the immediate future. The ceneral price level remains about the ame. Grains for livestock feeding are nominally priced in Portland at about \$30 a ten, although country Nary's impending candidacy and I prices are substantially above that trust it will be received with equal figure. .

> Winter grain on some Oregon land vith imperfect drainage often has a vellow green color in early spring. This can be overcome and the yield increased by early spring application of nitrates 60 to 100 pounds to the acre, well pulverized and broadcast toward the close of the rainy period, advises the experiment station. Best results are obtained on land having fair drainage.
