

THE TURNER TRIBUNE

F. H. Kaulley, Editor

Issued Every Thursday at Turner, Marion County, Oregon

SUBSCRIPTION \$1.25 PER YEAR. Entered at the Postoffice at Turner, Oregon, as second-class matter, under the Act of March 3, 1879.

Strawberry Industry in Marion County.

The practice of packing strawberries in barrels is a branch of the packing industry that is growing in favor all over the country. In this manner the berries are packed fresh and arrive on the eastern market in the same condition as when packed. Many tons are packed in this manner in Oregon every year and the time will soon come when this process will, to a great extent, take the place of canning. This year several tons were barreled at Stayton this year and in all probability the pack will be greater next year. There are acres of land around Turner that will produce good berries. They will produce here as well as any place in the county. With the number already growing berries and a number of others who, in all probability, would grow them, there is no reason why we should not have a barreling plant in Turner. In connection with this why not a tannery to take care of the surplus vegetables.

The usual number of petitions are being circulated for the different measures to come before the people at the general election this fall. Among them are the Old Age Pension Bill, the bill to abolish fish wheels, traps, gill nets and seines on the Columbia river. The first bill is a worthy one and should be placed on the ticket. It will solve the problem of caring for those that are dependent on the county or state for their care in their old age. It has been the means, in other states, of abolishing the poor farms and other institutions of like nature.

The bill to abolish the fish wheels, traps, gill nets and seines from the Columbia river, we are not so sure should be added on the people for voting at the general election. They have made the bill cover too much territory. If they had stopped with fish wheels and traps it might have passed. Fish wheels should have been abolished long ago. They destroy nearly as many as they catch. The way the bill is drawn up, it will practically destroy the commercial fishing on the Columbia river. It will, if passed, impair one of the greatest industries in Oregon, the fishing and canning industry. One of the circulators of this petition presented it to us the other day for our signature, and when asked the object of the bill, replied that it was to make it possible for the tourist and sportsmen to catch fish. Is it good policy to cripple one of the greatest sources of food stuff on the coast, allow it to continue as in the past. The right thing to do is to abolish the wheels and traps and allow the fishers to continue their operations.

An investigation is being pushed in Washington over the amount of money paid by a certain Congressman in his campaign for nomination as U. S. Senator from Pennsylvania. The one who gets hurt is the first to squeal.

ROBERTSON CLAN, HOLD ANNUAL MEETING

The Robertson Clan held their annual meeting in the city grounds at the Tabernacle, Sunday, June 13, 1926. They began to arrive Friday, and by noon Sunday over 150 had arrived, all members of one family. This is without doubt the largest family in existence holding an annual meeting and having a complete record of every day. The record goes back over 110 years and gives the place, date and name of every one, when and where they were born, when, where and to whom married, and their present address.

At 1 o'clock the table was spread and all sat down to partake of the necessities of life. After the dinner a short business session was held, at which time the following officers were elected: Pres., R. E. Robertson; Secretary-Treasurer, Lloyd Reed; Assistant Secretary, G. F. Robertson.

The balance of the day was spent in games and visiting. The day closed with a loud promise to be present next year.

CHURCH OF CHRIST

We missed you at Sunday school last Sunday. Why not plan ahead and look forward to attending next Sunday morning.

Owing to the fact that Brother Bass could not be with us last Sunday we had the privilege of hearing Brother J. Turner, of Australia, who is finishing his education at the Eugene Bible University. He came to Eugene earlier in the year. Before coming to Eugene he was for a time physical director of the Y.M.C.A. in Honolulu, Hawaii, in charge of 150 boys of many nationalities, where he gained much knowledge of the problems of the boys. He has studied boys' work in China and Japan. He plans to study boys in their native lands in the different nations of the world. Brother Bass will be with us next Sunday. The Endeavors will meet one half hour earlier to hear about some more of Jesus' apostles. They are planning to give a party to the young people of the community in the near future.

Last week we received a copy of the Pastor's Washington paper, also some copies of the M. E. Community church bulletin. Rev. Ralph Thomas, formerly of the Turner M. E. Church, is the pastor.

America Leads Nations In Use Of Ice Cream

If any one food may be considered as America's national dish, it is ice cream.

Ice cream is a food particularly adapted to the needs of individuals of all ages, giving as it does the best type of nutrition for the repair of bone teeth, blood and muscles and for energy. Today thousands of housewives make their own ice cream. As a consequence, the making of this highly nutritious food at a reduced cost, yet without in any way impairing the product, is of importance.

Home economists have found a means to this end in the use of evaporated milk. There are three important reasons why evaporated milk

makes the best ice cream, they point out. Because 99 per cent of the natural water in evaporated milk has been removed by evaporation, there is over twice the percentage of solids present in this type of milk than there is in ordinary market milk—and, since it is the solids that give ice cream its pleasing flavor, this fact is of moment.

Then, the composition of evaporated milk is constant, for the reason that it has been put through an homogenizing process, which breaks up the fat globules into tiny particles and distributes them evenly throughout the milk. This attribute makes for an ice-cream mixture of uniform quality and fine texture.

Finally, experts agree that the use of evaporated milk in ice cream contributes to its hygienic qualities, for the reason that evaporated milk is entirely sterile. Health authorities declare that milk and cream should be treated to a heat of 150 degrees F. for half an hour in order that a product may be produced free from infective organisms. Evaporated milk is processed at 240 degrees for 30 minutes, and, therefore, its introduction into an ice-cream mixture increases its purity in proportion to the amount of evaporated milk used.

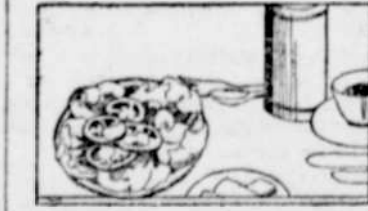

Effective But Simple Dishes Now In Vogue

Something simple yet effective is the housewife's ideal for week-end dishes.

During the warm summer weather, women should not be compelled to spend hours in the preparation of meals, when minutes would accomplish the same purpose. Planning week-end menus should be a congenial task, not a bore. At this time of the year there are a variety of nutritious vegetables and fruits to choose from in preparing meals and the modern home manager takes advantage of them. The housewife plans her summer menus so that they will suggest coolness, while at the same time taking into consideration their dietary value. A delicious cream soup made from fresh vegetables, or an omelet, a fresh fruit dessert, or a custard, a dish of ice cream, or a pudding, are nourishing items that should find high favor in the week-end menu.

The home manager enjoys her week-ends 100 per cent more when she has a few moments of leisure. And in this connection the following recipes may prove an aid.

Creamy Salad Dressing.
1 cup boiled or milk
2 egg yolks
1/2 cup cream
1/2 cup evaporated milk
1/2 cup sugar
1/2 cup vinegar
1/2 cup oil
1/2 cup salt
Combine evaporated milk and cream, chill and whip. Add sugar and juice, then fold into salad dressing. Especially nice for fruit salads.

Chocolate Velvet Cream.
1/4 lb. gelatin
1/2 cup butter
1/2 cup cold water
1/2 cup salt
2 eggs, beaten
1/2 cup flavoring
1/2 cup evaporated milk
1/2 cup sugar
1/2 cup milk combined with
2 squares (oz.) with
chocolate
1/2 cup whipping
1/2 cup evaporated cream, chilled
milk diluted with
1/2 cup water
Soak gelatin in water five minutes. Mix beaten egg yolks and sugar, pour heated, diluted milk over slowly, put in double boiler with gelatin, butter and salt. Cook until the mixture thickens. This taken about 15 minutes. Strain, beat 2 minutes, let cool. Melt the chocolate over hot water, let cool a little, then add the chocolate and vanilla to the mixture after it has cooled. Fold in the stiff egg whites, then the whipped cream. Turn into a mold and chill at least 8 hours. It may be chilled in individual dessert glasses.

Varieties of Cabbage
Something over seventy varieties of cabbages are known and cultivated. Some species attain a height of ten feet and the stalks are used for greens.

M. E. Church

Although the summer slump and the great amount of sickness has affected us to a certain extent, we are still having good attendance at Sunday school and church services. The pastor has been delivering some good sermons. The Epworth League meets at 7 o'clock and the evening preaching service is at 8 o'clock.

The Thursday evening prayer services are interesting and instructive. Different members of the congregation are taking turns as leader. The public is invited to all these meetings.
