HOW TO LIVE LONGER

******* JOHN CLARENCE FUNK

A BIG BUGABOO

MIDDLE-aged man the other day went to see his doctor. He was sick. There was no question about it. couldn't eat, he couldn't sleep. indeed, he admitted that it kept him busy to think in a straight line. In his own words he was "all shot to pieces."

Here was a man who had been splendidly protected against disease by modern scientific methods. His town boasted of one of the best filtration systems and consequently a pure water supply. The community was also the proud possessor of a modern sewage treatment works. He lived in a fine street and a fine house: he had good and safe food to eat; he exercised dally by taking a brisk twomile walk. He slept with his window open all night, he had been immunized against diphtheria, scarlet fever, tyshold and paratyphold, he had been raccinated against smallpox, but with It all he was a wreck.

No, he was not a fanatic. Health preservation hadn't gone to his head. But worry had! In this respect he was something like the rich man of biblical fame who hadn't as much chance of getting to heaven as a camel had in passing through the needle's eye. He had everything in the world to maintain health. But worry kept him out of it!

Worry is a bugaboo. It is usually based on the flimsy foundation of a disordered imagination. Worry is the dark cloud of life. Worry, in fact, is one of nature's very meanest tricks.

Take your own worries, for example. Be honest with yourself. Check back on them. Tabulate the things that have kept you awake at night; that have disturbed your digestion; that have at one time or another shaken you. And what do you find? Nothing. That's what! And "nothing" isn't much to worry

about, much less lose sleep over, is

it? Then why persist in doing it? If a chap is in a trance awaiting the command to go "over the top," that's something to worry about. If one has been caught stealing and sen tenced to five years in the pen, that also justifies worry. But the everyday fears about this and that which are going to happen and never dosn't it simon pure foolish to get sick for such little reason as that?

Don't let worry make a fool of you Kick it out the first time it shows its nasty, cowardly head. Tramp it down, step on it and kill it. Don't forget, if worry stays long, life goes. Take your

THE DEATH FLOWER

THERE is a beautiful flower that belies its looks. Its power to create human misery is unbelievable. The rack and ruln for which this bit of horticulture is responsible is perhaps the greatest single instance of unhappiness, pain and suffering in the

cially. The whole world is its market. Its slaves are numbered in the millions, and its despotism is definitely cruel. Such is the poppy, the producer of the drug known as oplum. In the pharmacopela, this narcotic

has a perfectly legitimate standing Used ethically, and administered by a physician only when extreme conditions of a disease demand it, it is a beneficent instrument. In the hands of conscienceless individuals it be comes a wicked tyrant; and in this role can, and does, sink humanity in-

to abysmal depths. The drug habit is a fact to be reckoned with in America. America has money and narcotics follow gold. Consequently. It is not surprising that the number of addicts in the North American continent have increased to an alarming degree within recent years.

Less than 1 per cent of the hundreds of tons of narcotics annually produced are actually required for medicinal purposes. The remainder is deliberately used to demoralize as much of the human race as can be brought under its influence.

It is not a pretty subject. But it does not pay to remain silent. When one's friend hands out a habit formng headache powder and a peddler reaches high school students, the problem has assumed sufficient importance to justify an open discusdon even if these instances are exreptional.

Oplum and its derivative, heroin are becoming entirely too popular. They invade the homes of the rich and the poor, the good and the bad. but they usually make hopeless wrecks of everyone.

Here are the "don'ts" on the drug evil: 1. Never take any medicine offered you by any person, friend or foe. Your physician is the only one to trust on this important question. narcotle or no narcotic. 2 Teach your children never to accept any powder or pill from strangers or friends. These rules are plain and easy ones. Fight shy of "dope" as you would of death itself. (@. 1929 Western Newspaper Union.)

To Conjure With

The expression, "a name to conjure vith," harks back to the time when conjurers claimed to perform their tricks by uttering some "name of power," such as Solomon,

FARM

CLEAN GROUND IS BEST FOR RANGES

One of Most Important Points in Growing Pullets.

Clean ground for ranging is one of the most important points in the growing of healthy pullets which will ecome vigorous and profitable layers, it is pointed out by the poultry husbandry department of the Ohio State university.

"A large percentage of the mortality in the growing flock, as well as in the matured laying flock, is caused either directly or indirectly by intestinal parasites," P. B. Zumbro, poultry specialist, says in a recent extension service publication. "These parasites, as well as many disease germs, are carried over from year to year in the soil."

Zumbro urges that chick ranges be on land on which no other chicks have been raised or old hens ranged, for at least two years. Alfalfa, he says, makes one of the best chick ranges. Clover is almost as good, and blue grass comes next.

"Many poultry men think an alfalfa or clover field is too valuable for rearing chicks. This is a mistake. Poultry grown on good range will give a return equal to that from any live stock, or better. Good results can be obtained by having two or more ranges, and a crop can be grown in the meantime. This method will provide clean range and will enable the owner to have the brooder house near the farmhouse, saving time in going to and from the house. When this method is used, one acre of land should be provided for each 500 chicks."

Wonderful Feats With

Turkeys Are Reported Really wonderful results with turkeys are reported from the Ontario government turkey farm in Norfolk ounty. Years ago this province used to raise turkeys by the thousands but disease got in and flocks have been diminishing to such an extent that each year thousands of birds are brought in from the West. The disease puzzled people and except where there was unlimited range the raising of turkeys languished. Even in the places where there was plenty of range, such as in the rocky districts on the edge of forest lands, difficulties in the shape of foxes and wolves were encountered. It looked for a while as if there would be practically no turkeys raised in Ontario. But Prof. W. R. Graham took hold of the thing and he soon found out that the disease came from the ground and the germs were so hardy that they could adopted the plan of feeding everything in troughs and moving these troughs each day and his results have have been light on the experimental turkey farm and some excellent birds

******* Poultry Notes

********** It pays to worm the poultry.

It requires 21 days to hatch hen

Care must be taken that chicks do not crowd in corners and smother.

Shut the sheep in at night, allowing them to bed in the corral or shed Coccidiosis usually occurs in young

chicks from two to six weeks of age. When the poults are about eight weeks old, they can be removed to the rearing ground.

Tapeworms have been named as the cause of death of 50 per cent of the chickens in some flocks.

Changing breeds every year has never yet been found a safe foundation for a profitable poultry business.

A month lost in growing out pullets means the loss of a month's production next fall when eggs are a good

Any variety of wheat is good for poultry. In fact, small undeveloped shriveled wheat if dry is even better than the fully developed kernel.

The farmer who produces eggs of uniform color, weighing an average of 23 ounces per dozen, and which are held in a cool cellar, can ship to eastern markets by express to advantage.

The profit from the farm flock depends to a large extent on the number of eggs the hens lay.

Hens cannot lay eggs without protein. Skim milk is one of the best forms of protein for use with all

classes of poultry. Mongrel geese plucked regularly yield one pound of feathers a year. Pure-bred geese yield twice as many and, besides the good prices of feathers obtained, the goose is worth as

much as it ever was. Tight floors should be provided to protect the ducks from attack by rats and other rodents.

Ground oats and ground barley are of equal value in a ration for chickens. Both of these feeds run rather high in crude fiber.

Egg production cannot be increased by crossing two high-producing egg strains, nor can vigor and vitality be increased when both parent stocks

SAME PRESCRIPTION **HE WROTE IN 1892**

When Dr. Caldwell started to practice addicine, back in 1875, the needs for a

medicine, back in 1875, the needs for a laxative were not as great as today. People lived normal lives, ate plain, wholesome food, and got plenty of fresh air. But even that early there were drastic physics and purges for the relief of constipation which Dr. Caldwell did not believe were good for human beings. The prescription for constipation that he used early in his practice, and which he put in drug stores in 1892 under the name of Dr. Caldwell's Syrup Pepsin, is a liquid vegetable remedy, intended for women, children and elderly people, and they need just such a mild, safe bowel stimulant.

This prescription has proven its worth

bowel stimulant.

This prescription has proven its worth and is now the largest selling liquid laxative. It has won the confidence of people who needed it to get relief from headaches, biliousness, flatulence, indigestion, loss of appetite and sleep, bad breath, dyspepsia, colds, fevers. At your druggist, or write "Syrup Pepain," Dept. BB, Monticello, Illinois, for free trial bottle.

Effort of the Artist

Not Always Understood The artist who recently told how, when painting a landscape at the foot of the Pentlands, he was asked by the occupants of a cottage nearby not to paint the cottage windows till clean curtains were put up, now tells of are other incident which occurred to him. He was painting a landscape when a man appeared on the scene and looked over his shoulder in the annoying manner of passers-by who silently criticize -or maybe admire-the incomplete picture. The man produced a pair of horn-rimmed spectacles, through which his eyes ogled at the canvas. Then he removed the "headlamps" to observe in a marked American accent: "You'll excuse me for saying so, but I'm curious to know jest what makes you fellers paint these things, when there are so many to be bought up easy and cheap."-Montreal Family

Change in French Feeling Frenchmen are abandoning the old sugar bowl, the loose brick on the hearth and the woolen sock for savings banks, figures published by L'Officiel, the Congressional Record of France, indicate. On deposit in the savings banks of France December 31 was 17,961,664,203 francs, which is almost \$1,000,000,000, representing live over in the coldest weather. He an increase over 1927 of 3,355,406,280 francs. The number of accounts was 9,251,791, of which 608,888 were new ones. These statistics are regarded been unusually successful. Losses as interesting in view of the belief entertained universally that the wealth of France could not be revealed statistically because most of it was hoarded and hidden from the eye of the governmental calculators.

Score One for the Mosquito

Great Britain has a Mosquito Control institute which maintains a laboratory on Hayling island for the study of mosquito problems and the director claims to have discovered, in the course of his investigations, that the bite of the mosquito is a cure for paralysis. The insect was used as a means of conveying the malaria germ to the paralysis patient and according to the reports the fever was invariably lessened and in several cases complete cure was effected.

Early Written Works

fluminated manuscripts are those whose texts are brightened and heightened by vignettes and otherwise decorated in colors or in gold and silver. Fifteen centuries before Christ the papyrus rolls of the Book of the Dead were illuminated with brilliantly colored scenes. Later, as writing became alphabetic, the important letters were Illuminated.

Questions and Answers

"You have shown a remarkable familiarity with public questions." "I have heard every question that can be asked," said Senator Sorghum.

"What worries me is that I don't know

any answers." Many find Russ Ball Blue good tonic for chickens. Large package at Grocers .- Adv.

Must Study Safety

Seven states now have safety instruction as a part of their school curriculum. They are New Jersey, North Carolina, Ohio, Virginia, Pennsylvania, Illinois and Indiana.
