**DR. CALDWELL'S THREE RULES**

Dr. Caldwell watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation is a mild vegetable compound. The Doctor never did approve of drastic physics and purges. He did not believe they were good for human beings to put into their system. Use Syrup Pepsin for yourself and members of the family in constipation, biliousness, sour and crampy stomach, bad breath, no appetite, headaches, and to break up fevers and colds. Get a bottle today, at any drugstore and observe these three rules of health: Keep the head cool, the feet warm, the bowels open. For a free trial bottle, just write "Syrup Pepsin," Dept. BB, Monticello, Illinois.

**Desert Area Believed to Hold Mineral Riches**

The San Rafael Swell, a wild waste of buttes, mesas and deep steep-sided canyons, heretofore considered of little value save as a rather poor grade of pasture land for a few herds of sheep, may be about to step forward to claim its share in the progress of the world. This section of the desert area of Utah has been visited by experts of the Geological survey, and nearly two-thirds of its area has been carefully investigated. There seems to be promise that a valuable find of helium, that boon to lighter-than-air craft, has been made and there are hopes that deposits of petroleum will also be developed. The Swell yielded a fair quantity of radium and uranium during the World war. The rocks contained in the Swell embrace representatives of all the geological periods from the Permian to the Upper Cretaceous.

**Easy to Sever Marital Knot in Soviet Russia**

The matter of marriage and divorce are very simply disposed of by the Soviet laws. All legal formalities are practically dispensed with and, tiring of matrimony, either party to the arrangement has simply to leave the other and advertise the fact, which may be done at a cost of about \$1.50. The christening of children has gone to the discard as an institution along with other religious rites. A Communist father desiring to show his party loyalty and to dedicate his offspring to the Communist cause will carry his infant to his office, shop or factory and there in the presence of his comrades declare his predilection in the matter of a name "Mal or Oktyabr," perhaps, in commemoration of revolutionary dates or that of some revered party leader. "Ninel," the reverse of "Lenin," is a favorite for the girls.

**Unusual Mineral Deposit**

During the World war a prospector searching an old tunnel near Libby, Mont., noticed flakes of a coarse mica-like mineral that writhed and swelled enormously when touched by the flame of his candle. The flaky mineral proved to be vermiculite, which further examination showed to be present in great quantities. Vermiculite is applied to a group of minerals that expand and give off water upon heating. The name arises from the fact that some members of the group open into long, wormlike threads. The heated and expanded material is very light, exhibits a golden or silvery luster, and appears to have very low heat conductivity. These properties suggest possible important uses, says Geological Survey.

Who, then, is free? The wise man who can govern himself.—Horace.

"Oh, what heavenly jazz!" said the girl. "Let's dance." "That wasn't jazz," said the young man. "Major Lush upset his table."
