THE TRIBUNE TURNER, OREGON

Dr. Caldwell loved people. His years of practice convinced him many were ruining their health by careless selection of laxatives. He determined to write a harmless prescription which would get at the cause of constipation, and correct it.

Today, the prescription he wrote in 1885 is the world's most popular laxative! He prescribed a mixture of herbs and other pure ingredients now known as Dr. Caldwell's Syrup Pepsin, in thousands of cases where bad breath, coated tongue, gas, headaches, biliousness and lack of appetite or energy showed the bowels of men, women and children were sluggish. It proved successful in even the most obstinate cases; old folks liked it for it never gripes; children liked its pleasant taste. All drugstores today have Dr. Caldwell's Syrup Pepsin in bottles.

No Use "Pa says there will be a coal short-age by 1940." "What's the use of looking for trouble that far ahead?"

The baseball umpire who renders decision against the home team knows what it means to be friendless.

If we will scientifically find out more about life on this earth, we may learn more of the life beyond.

For the first time in the history of England, music and drama were presented in a cathedral on the occasion of the Canterbury Cathedral festival. Plays took place outside the west door and in the chapter house, concerts were held in the nave, serenades in the cloisters, and chamber music in the new chapter house. The photograph shows the folk dancers dancing before "Death" during the performance of the drama "Everyman" outside the great west door.

Training for Airplane "Crash" Rescue Work

A school for training personnel in airplane "crash" rescue work has been opened at the naval air station at Washington. Particular emphasis is laid on rescues where the plane falls into the water, subjecting its occupants to the additional hazard of drowning. The photograph shows a crew simulating the rescue of the occupants of a plane which has "cracked up" and is submerged except for the tail.

CHECKMATE

The stately old aristocrat was approached somewhat cockily by a rich and vulgar young man, who announced :

"I say, sir, I am thinking of marrying one of your girls. Have I your permission?".

"Yes, indeed," was the reply. "Which one interests you? The maid or the cook?"-Boston Transcript.

Mean Brute

"It is terrible the number of murders there are," exclaimed Mrs. Grouch.

"Yeah !" growled her husband, "but with the number of backseat drivers there are it is nothing short of remarkable that there are not more."

THE REPTILE

Gladys-"The reptile ! How dare be speak of me that way!" Maggie-"Why call him such a name?" Gindys -"He's a lounge lizard, that's why."

Then He Passed On

He passed the cop sans any fuss, He passed a load of hay, He tried to pass a swerving bus, And then he passed away. Cautious

"You'll notice that I've written the address on both sides of the label for this package." "Yes; any special reason, madam?"

asked the post office clerk. "Well, I thought it would be safer in case the label comes off."

Anticipating the Hereafter

Mr. Knagg-But, my dear, you know I'd go through fire for you. His Wife-I suppose you will go through fire when your time comes and you'll say it was for me because it would be like you to blame a poor

widow for it.

The original Welland was first salled in 1829. It was 271% miles long. 22 feet wide, 8 feet dee; and contained 40 locks, each 110 feet long. It was enlarged, rebuilt and again placed in service in 1845. The present canal, which represents another step-up in size, was opened in 1882. The one now building probably will be ready for service some time during 1930, has been built to dimensions which it is thought will be sufficiently large to meet the increased size of cargo vessels plying the Great Lakes for many years to come. It will be 25 miles long, 80 feet wide, 25 feet deep and have 7 locks each 800 feet long and 30 feet deep with a lift of

461% feet which will lift or lower passing vessels the 3251/2 feet which represents the difference in level between the two lakes. Some 4,000 vessels pass through the present canal annually. Some conception of the magnitude

of the work of constructing the new ship canal can be gained from the fact that some 6,000,000 wagon-loads of rock and 40,000,000 wagon-loads of earth had to be excavated, while enough concrete was used to build a solid wall 20 feet high, 6 feet thick and 100 miles long.

The time required to pass a loaded vessel through the completed canal will approximate 8 hours, as against 15 to 18 hours with the present canal. The cost of the completed job will approach \$100.000,000.

The Los Angeles Aqueduct

THE Los Angeles aqueduct is "as long as England is wide. It goes under mountains, through 142 tunnels and crosses a desert as large as the state of Massachusetts." It was built to insure the largest city on our western coast with a sufficient and everlasting supply of pure water, cost \$24,-500,000, took five years to build-as many as five thousand men worked on it at a time, is bailed as a spectacular feat of engineering and measures up to the job.

High up in the Slerra mountains there was fresh water galore, but that was 250 miles away and the San Fernando valley lay between. But the need outweighed the handicap and to work they went. The Owens river was tapped and 250 miles of open and covered canals and massive steel conduits constructed; 31 giant storage reservoirs created along the way-the largest, Halwee, capable of handling 20,000,000,000 gallons annually, made available to this City of the Saints a daily water supply approximately 226,100,000 gallons.

The constant movement of such a great quantity of water presented a too-good-to-be-true opportunity for of cheap electric power, through the construction of a string of generating On old oak tree, called "Madame de Sevigne" in honor of the French plants located at strategic points. The combined water and power system is writer, has been cut down at Forgesone of the largest municipally owned les-Eaux, France. Helped By Lydia E. Pinkham's Vegetable Compound

Little Rock, Ark.--"I was sick for three years after my last baby came. I could hardly walk

family and do the work for all. Your Compound made me a well woman, and I have a happy home now. I al-ways try to keep a bottle of the Vege-table Compound in the house and I tell everyone about it for I know it will help them."--Mas. H. A. ADAMS, R. F. D. 5, Box 63, Little Rock, Arkansas.

Army of Hunters

Pity the roor, wild game of this country! Based on last year's figures, an army almost three times the size of the A. E. F. in the World war is about to move on the rabbits and deer, ducks, partridges and other game fowls and animals. Hunting licenses for the 1928 season were issued to 6,450,000 people, who paid in excess of \$9,000,000 for the privileges of hunting. New York state led with 675,780 licenses and Pennsylvania was second with 517,729.

Natural Fountain

Seepage water from irrigation enters a large pear tree at Brass Valley, Callf., and issues under pressure four feet up the trunk. The trunk forks at that height and a crack in the fork forms the vent for a tree fountain that is attracting much notice.

Shattered Adage

It must have been the village idiot who invented the adage, "Don't judge others by yourself." Oneself is the only person on earth by whom one can possibly judge others.-American Magazine.

To Finish the Job

His Wife's Mother-1 nearly died laughing at that story you told. Mr. Pester-That so? Listen; I'm goin' to tell you a few more.

It is a noble and a great thing to cover the blemishes and excuse the fallings of a friend.-South.

The German cruiser Emden shown in the harbor of San Diego, Calif. where it stopped on its training cruise around the world. The vessel carries more than four hundred officers and men and has a speed of 29 knots.

Twins Appointed to West Point

Raymond M. and Leroy M. Anderson, twin sons of Mrs. Laura M. Anderon of Womelsdorf, Pa., who were appointed by President Hoover for entrance into West Point in 1930. The father of the boys, Martin M. Anderson, was killed during the Marne offensive.

SHORT ITEMS TO REMEMBER

In Bollvia all the useful minerals belong originally to the state. Canada's area comprises one-third of the land surface of the British em- pire. Bank and jewelry stores are install- ing secret tear gas systems to foll burglars. The marble quarries at Carrara were first worked by the Romans	astronomers believe. Potatoes were introduced into New England from Ireland. Coal has been found 800 miles north of the Arctic circle. The French perfumery industry is valued at \$36,000,000 a year. United States naval vessels were the first ships to be equipped with electric
