

# When Food Sours

Lots of folks who think they have "indigestion" have only an acid condition which could be corrected in five or ten minutes. An effective anti-acid like Phillips Milk of Magnesia soon restores digestion to normal.

Phillips does away with all that sourness and gas right after meals It prevents the distress so apt to occur two hours after eating. What a pleasant preparation to take! And how good it is for the system! Unlike a burning dose of soda-which is but temporary relief at best-Phillips Milk of Magnesia neutralizes many times its volume in acid.

Next time a hearty meal, or too rich a diet has brought on the least dis comfort, try-

### **Greeks** First to Divide

Day Into Equal Parts It is not definitely known just how the day happened to be divided into 24 hours. At the time of the Homeric poems the day was divided into three parts-the first beginning with sunrise and comprising that part during which the light increased; the second, midday, during which the sun was thought to stand still, and the third period during which the atmospheric warmth in creased. These divisions were later subdivided either by Anaximander or Anaximines, who is said to have made the Greeks acquainted with the use of the Babylonian chronometer or sun dial, by means of which the natural day was divided into 12 equal spaces. The earliest sundial of which we have knowledge was that of the Chaldean astronomer Berossus, who lived about 300 B. C. Its arc was divided into 12 equal parts of time. At Babylon the period from sunrise to sunset and also the period of darkness were each divided into 12 hours. According to this arrangement, the day hour was in the summer longer than the night hour and in the winter shorter. The Greeks improved upon this system by dividing the whole period into 12 equal hours

#### Again

Richard, age three, is the proud pos sessor of a six-months-old brindle bull dog. The pup is quite mischlevous and so is Richard.

The other day mother found her freshly-leed cake in a deplorable con-

gun in 1800, has been referred to as the first cathedral to be erected in America-presumably because it has the distinction of being our first church to be presided over by an American cardinal. It crowns a bill which the victorious troops of Rochambeau encamped on their return from Yorktown during the Revolutionary war in 1782.

This structure was built of gray granite, which was hauled in by or teams from a quarry near the Pataps-co river. It is 190 feet long, 177 feet wide at the arms of the cross, surnted by a gilded dome, which is 231 feet in circumference, and carries necultariy shaped towers which two are strangely suggestive of the Far East. One of these towers is the home of quite a sizable bell, cast in Lyons. France, which throughout all these years has looked out and down upon the varied activities of bumanity What a story of pathos and joy, strife and prosperity, change and progress, it could relate!

Unusual as well as remarkable for its pure simplicity of design and pleasing proportions, this historic building contains splendid and valuable paintings-one outstanding one having been presented by Louis XVIII, king of France, and an ancient organ which is said to have been the largest in all America at the time of its completion. Under the throne is a sacred mausoleum in which repose the remains of former dignitaries of the church, among them being that of the muchloved councilor, the former James Cardinal Gibbons, who served his church for almost half a century. Much of the Catholic history of America was made in this noted church and the adjoining home of the former prince of the church.

#### . . . America's Longest Tunnel

THE recently opened, eight-mile-tong tunnel through the granite backbone of the Cascade mountains-100 miles east of Seattle, is the longest tunnel in America. Built at a of about \$14,000,000, by the cost Great Northern rallway, this tunnel and its approaches clips nine miles from the old route, permits the railroad to penetrate the range at a reduced grade of about 500 feet and, of course, saves that amount of elimb, eliminates curvature equivalent to approximately ten complete circles, displaces several miles of snow sheds, reduces the cost and work of keeping the road open during the winter season, does away with delays due to snow slides and brings the North Pacific coast closer to the balance of the country in point of time and is, therefore, a national asset of no mean importance.

This Cascade tunnel is a remarkable engineering achievement. So accurately were the calculations made that when the two ends met 3,000 feet under the crest of the range and four miles from the western entrance, the difference in elevation was but nine inches, while the difference between estimated and actual distance was only 12 inches. Work was pursued day, aight and Sunday-not a single shift was lost. At one time, 1,793 men were employed. The entire job was completed within three years. The walls throughout are lined with concrete two feet thick. Enormous electric locomotives will be used to haul both freight and passenger trains through this bore.

French troops, evacuating the Rhineland, marching out of Coblenz behind the tricolor. Their departure was reat relief to the Germans.

# Building the World's Largest Relief Map D E 1-3 Antana a

Le Roy Nichols, map engineer, placing one section of the largest relief map in the world, being constructed in a special map house in Babson Park, near Boston. The map, constructed of special gypsum blocks, will be 63 feet long and 46 feet wide and will follow the curvature of the earth.

#### **BUSINESS**

"I can't do a thing with Parker," said the manager. "I've had him is three departments, and he dozes ab day long."

"Put him at the pyjama counter," suggested the proprietor, "and faster a card on him with these words:

"Our pyjamas are of such superior quality that even the man who sells them cannot keep awake." -- Tit-Bits

#### Clay Pipe Joke?

The owner of a cheap watch brought It into the jeweler's shop to see what could be done for it. "The mistake I made, of course," he admitted, "was in dropping it."

"Well, I don't suppose you could help that," the jeweler remarked. "The mistake you made was picking it up" -London Opinion.

Arthur give you presents of dia monds? "They're stepping stones to marriage, my dear."

Numerous Enemies He who has a thousand friends Has not a friend to spare. And he who has one enemy Will meet him everywhere.

#### Forming a Career "You take a new flat every year?"

"Yes," answered Mr. Meekton, "I had thought of persuading Henrietts to go into the movies."

"Why not?" "Her natural eloquence is such I thought she'd better wait for the latest developments and take her chances with the talkies."-Washington Star.

#### Warning

Doctor Pearson (after bringing him to)-How did you happen to take that polson, Rastus? Didn't you read the sign on the bottle? It said "poison," Rastus-Yessah, but ah didn't be lleve it.

Doctor Pearson-Why not?

Classifies 256,000 Stars About 32,000 observations of variable stars were sent to the Harvard observatory in a single year by 100 observers. One of the monumental pleces of work there, says Nature Magazine, has been Miss Annie J. Cannon's classification of over 256,000 stars, according to their various types, by means of their spectral lines. This work requires expert ability of the highest order and Miss Cannon has

#### Feminine Embellishment

A farthingale is a contrivance, resembling a hoop skirt or crinoline. It was worn by women of the Sixteenth and Seventeenth centuries to extend their skirts.

Humility is a feeling not to be displayed.

**Denver** Boy

dren good bowel habits until the polsons from decaying waste held too long in the system have begun to affect the child's health.

Watch your child and at the first sign of constipation, give him a little California Fig Syrup. Children love its rich, fruity taste and it quickly drives away those distressing allments, such as headaches, bad breath, coated tongue, billousness, feverishness, fretfulness, etc. It gives them a hearty appetite, regulates their stomach and bowels and gives tone and strength to these organs so they continue to act normally, of their own accord. For over fifty years, leading physicians have prescribed it for half-sick, billous, constipated children. More than 4 million bottles used a year shows how mothers depend on It.

3

Mrs. C. G. Wilcox, 385514 Wolff St., Denver, Colorado, says: "My son, Jackle, is a prize winner for health, now, but we had a lot of trouble with him before we found his trouble was constipation and began giving him California Fig Syrup. It fixed him up quick, gave him a good appetite, made him sleep fine and he's been gaining in weight right along since the first few days, taking it."

To avoid inferior imitations of California Fig Syrup, always look for the word "California" on the carton.

#### A Super Power Plant on Wheels

THE largest steam locomotive on earth was built to haul all the freight cars the coupling pin would hold across the so-called "Bad Lands" in western North Dakota, by the American Locomotive company for the Northern Pacific rallway.

It has 22 wheels and, including the tender which holds 21,000 gallons of water and 27 tons of coal, is 125 feet long and weighs 1,116,000 pounds. It is so monstrous that one is inclined to say, like the man in the zoo who saw a giraffe for the first time. "Shucks, there ain't no such animule !" The details of this mastodon of the rails gad somewhat like a fairy tale. The boiler, for instance, is almost 64 feet long, weighs 165 000 pounds, its inside diameter at the small or front end is 81% feet and is intended to operate at 250 younds steam pressure; 20,000 holes were drilled in it and 5,153 stay-bolts are used to hold its seams together. Its fire box is 22 feet long and 914 feet wide-larger than an ordinary room.

Because of its tremendous size and power both the throttle and reversing mechanisms are operated by compressed air. Coal can be mechanically into its seething furnace at rate of 45,000 pounds or 2214 the tons an hour and twin centrifugal pumps are capable of forcing 100,-000 pounds or 12,000 gallons of water into its boller in the same time.

Norway Celebrates in 1930

In 1930 Norway will celebrate the ninth centenary of the coming of Christianity, together with the anniversary of the death of King Olav II, who died in the struggle against the opponents of the new faith. Celebrations will take place in all parts of the country but the principal ceremony will be held at Trondjhem, an old royal residence and the seat of an archbishopric before the Lutheran reformation. The work of restoring the cathedral has been proceeding for a long time. It was built on Olav's tomb. The completion of the work will coincide with the celebration of nine centuries of Christianity in Norway .-Translated for the Kansas City Star From the Journal de Geneve.
