In the usually quiet home of Rev Mr. Toiliver of Red Thrush Iowa, his motherless daughters. Helen, Miriam and Ellen-"Gin-ger Ella"-are busy "grooming" their sister Marjory for partici-pation in the "beauty pageant" that evening With Eddy Jack-son, prosperous young farmer, her escort, Marjory leaves for the anticipated triumph. Over-work has affected Mr. Toiliver's eyes to the point of threatened blindness. Ginger has tried in many ways to add to the family's siender income, but she is not discouraged. Marjory wins the beauty prize, \$50.00. She gives beauty prize, \$50.00. She gives the money to her father as part of the expense necessary for the treatment of his eyes by Chicago specialists. Mr. Tolliver leaves for Chicago with Mirlam. Gipger meets Alexander Murdock. Mr. Tolliver returns, the doctors giving him little hope.

### CHAPTER IV-Continued -7-

"And everybody who buys one, will sell rour more-

"And it all started from one. One single, solitary, little one."

The girls talked on and on. But Ginger drew herself away from them. sat enwrapped in impenetrable thought She remembered the old chain letters. They had come with some frequency a few years ago, prayers for almost everything, for the sick for foreign missions, for prohibition, for fundamentalism, for the second com ing of the Lord, for the release of anarchistic prisoners condemned to death-

home. Aiready the old house looked "And everybody sends it on to so a new place to her, a rosy place, bright many more, and every one of them with flowers, fresh paint, new furnisends it to so many more, and they ture. send it-" Helen herself had said it. Thousands

Ginger got up suddenly and went out of the room. She walked dizzlly She went upstairs, got the short lad cause, nobody could begrudge it." der from the linen closet, and balanced it against the wall under the trapdoor. She noticed that her hands trembled. But she climbed carefully -the ladder was old-pushed up the trapdoor, and pulled berself through the opening. From force of habit for she was not then thinking of trandoors, she locked it behind her, and made her way carefully over the beams to her sanctuary under the dormer window. There she sat down heavily, to think. She thought, and

eyes were so wide, so bright, so blue, that of a sudden they seemed to hurt ber, and she shut them hard. Her two small hands were gripped so tightly with fingers interlaced so closely, that suddenly she knew they were throb bing with pain, half paralyzed, so that she had to work them apart, slowly, a finger at a time. But she did not stop thinking.

thought, and thought, until her bright

left side of the pulpit. The bridesmaids were to gather in the primary room, just inside the main entrance. Helen decided that when all the invited guests sat silently waiting within the church, she, with her father, would walk quietly across the intervening space from parsonage to church-such a very little wayand while Ellen took tim on around to the pulpit room on the right of the altar, she would join her attendants in the primary department. For fully a week, although but ten

days had elapsed since the forging of the first link that was to grow into an endless chain of sliver dimes, Ginger had dogged the steps of the post-

"Letter for me? There's not? That's funny."

But on the very day before the wedding, as though to fill her cup to utter overflowing, the postman dellyered three letters addressed to E. Tolliver, all in strange bandwriting. "Well, that's funny," stammered Ginger, and held out a trembling hand. and with the guilty consciousness of the evildoer, sure the very postman must be suspicious of such a sudden herself was deeply enamored of the burst of correspondence, she added, "Bunch of ads, I suppose." She was so excited that she fell off the ladder three times before she finally got herself-and the three letters-into the attic studio under the dormer-window. She was trembling nervously. Her chilly fingers tore uselessly at the stiff paper, she had it open at last, a dime rolled out upon the floor. She selzed and kissed it.

"You're my nest egg." she whispered, "you're my lucky piece, you're what some dumb farmer would call pay dirt."

She opened the other letters, three dimes resulting. A sort of stillness She decided upon three as a fair came over her. She sat, huddled start. "Three links are better than into a small hunch on the old stool one." she said thoughtfully. "And if and read the letters-pleasant letters. sympathetic, "It is a joy to help in such good work," "God bless the It starts three chains, so much the

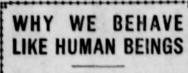

"Pleasure to add my mite." cause," "The darlings." said Ginger. "The dear, sweet, generous, Christian souls." Ginger had a significant habit of judging one's Christianity, not by his thoughts, but by his contributions. Three dimes to her represented three devout Christians. Very still she sat on the old stool, very quiet, enveloped

mind leaped swiftly on, to expensive curative treatments for her father, new rich furniture to replace their threadbare shabbiness, coal and steak and chickens-

"Oh. I wish I had asked .or quar-Then she cast about for a proper reters," she thought. "Such a very good Had it not been for the pleasurable excitement attendant upon Helen's wedding, Ginger felt she could not possibly have endured the strain of the days that followed. Her confidence in the outcome of her chain letter home-for-the-blind was absolute. Winters might come, with their con sequent coal and coat bills, daugh ters might go, with their petty love affairs, but Ginger Ells and the chain Plans for the wedding took prece dence over everything else, for Helen. else off her desk, and directly in the

By GEORGE DORSEY, Ph. D., LL. D. Some People Are Born With Gilla

WE NO longer tell friends from enemies by smell; but we often pick them by the shape of their nose. Man's nose is not so striking as the elephant's, or even the long-nosed monkey's, but it features his face and is one of his most human and super-

fluous elements. As it is a new acquisition, it began with mammals, it appears late in fetal life and develops fully only after birth. Its shape and size are hereditary and are distinguishing traits of race. But it has no more to do with brain power than the handkerchief that wipes it.

As the olfactory nerves alone are connected with the hemispheres of the human brain, it is inferred that the brain itself arose in connection with the sense of smell; the original brain was a smelling organ.

In mammals generally, the smell sense is the most highly developed of all senses. In monkeys, it has already begun to diminish. Some mammals have five pairs of ridges supporting the olfactory organs; some hoofed animals have eight; apes usually have three. Man has from two to five pairs.

The nose in the human embryo is at first a pair of pits or pockets in the skin-the condition in fishes. The external nose appears much later.

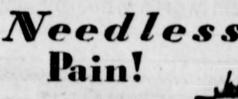

The ear also begins as a pocket, in the first gill-cleft. This sinks into the head until its outer opening is closed by the tynpanum or eardrum. A rare anomaly is an individual with two, or even three, external ear openings; these represent the second and third gill-clefts. In some fishes the opening remains; their ear is primarily a balancing organ. Our equilibrium sense organ is also located in the inner ear; if our semilunar canals are destroyed, we cannot balance ourselves.

We turn our head toward sounds or cup our hands behind our ears; our ancestors turned their ears. to-the-girth movement."

Our eyes are compound and are made up of the same three parts that are found in fishes' eyes. First, a cluster of skin cells dig in to form the lens; skin grows over this, becomes transparent, and forms the cornea. Next, a growth from the neural tube reaches out and ends in a cup around the lens. This cup becomes the retina; the stalk which joins cup with tube, the optic nerve, Cells from the middle germ layer now enter the cup and form the transparent matter of the eyeball. The middie layer also supplies skin structure ; it is subject to the horny change of old age. Hence "cataract" of the eye; the lens has become covered with a scale.

The Asiatic's eye is not oblique. The "slit" appearance is due to the low nasal bridge supporting the upper lid; the lid thus folds and appears "Mongolian." This "oblique" eye is not un-common in white children at birth; when the bridge develops slowly it may persist for months, even into adult life.

The tears which wash our eyes-

The man who wouldn't drive his motorcar half a mile when it's out of order, will often drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nerves! It's unwise, and it's unnecessary. A tablet or two of Bayer Aspirin will relieve a headache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions

answered that question years ago. and you'll discover many valuable uses for these tablets. For headaches; to check colds. To ease a sore throat and reduce the infection. For relieving neuralgic, neuritic, rheumatic pain.

People used to wonder if Bayer

Aspirin was harmful. The doctors

It is not. Some folks still wonder if it really does relieve pain. That's settled! For millions of men and women have found it does. To cure the cause of any pain you must consult your doctor; but you may always turn to Bayer Aspirin for immediate relief.

KOENIG'S NERVINE

# Weak After Operation

"About five months ago, following an operation for appendicitis I did not gain strength enough to be up and about. My mother and sister advised me to take Lydia E. Pinkham's Vegetable Com-pound. I have taken five bottles and it has helped me to get strong so I can do my own housework now. I have recommended it to several friends who have been weak and rundown."-Mrs. Oscar Ottum, Box 474, Thief River Falls, Minn.

"Chain letter-on and on-all over the world-thousands and thousandsand nobody dares to stop because nobody would dare to break the chainfor the blind-a home for the blindon and on and on."

Sudenly Ginger burst into low nervous laughter, and laughed and cried and twisted her little hands, and rocked back and forth on the stool In an ecstasy.

"Oh, oh, how heavenly, how perfectly heavenly! I never could have thought of such a brilliant thing. Oh. as father says, I see the hand of the Lord in this !"

She pulled the stool to the low table which she used as a desk, and seated herself with a professional briskness indicative of the oneness of purpose which prompted her. Selecting three pencils from a large number in the with Eddy Jackson as his best man. drawer, she sharpened them briskly was to walt in the small room at the Then she drew her pad of paper toward her, and opened IL

Then she studied intently, chewing her pencil. She wrote a basty line. and quickly scratched it out. Again she wrote, again she frowningly discarded it. Several times she repeated this painful process, but at last, as so often happens, persistent effort brought inspiration, and she wrote fluently, without a pause for thought.

"Our parsonage home for the blind is sadly in used of funds to carry on its noble work. Will you not contribute Ten Cents to this very worthy cause? And complete the chain of good vibrations by sending copies of this letter to three of your friends in whom you have confidence? In this way, this valuable institution will en large its circle of friends and will be enabled to continue its care of the un fortunate and needs blind.

"We depend ou you. "Do not break the chain. "E. Tolliver, treasurer.

Ginger was greatly pleased with the formal tone of this letter. She knew very well that if she received such an appeal, she would contribute gladiyif she had the money. She read it over and over, adding a word, omltting a word, substituting a word, until the final version seemed impossible of Improvement.

The question to whom the letter should be sent was subjected to deep thought. Indeed, it was more than thought, so deep it was. Men, she knew, were more susceptible than women to personal appeal-particularly when the personal appeals came from not unattractive girls. But womwere more superstitious and would be more reluctant to bring upon themselves the implied curse that would result from a breaking of the chain Women, then,

yielding to the argument that for her in this case the way of genuine sacri tice lay in gracious acquiescence to plans already made, proceeded calmly with her arrangements. She knew in her heart that she would have preferred a more apparent display of her unselfishness. She would have enjoyed a real martyrdom. She would have been proud to stand gioriously forth, to her father, her sisters, and Red Thrush, giving up her marriage for a year, for ten years, for ever, If need be. But she was bonest enough to realize that the course of true denial followed another channel Mental rest, the doctors had prescribed, and that could never be had in the sacrifice of his daughter's plans The wedding was to be held in the church, with the girls of Helen's Sun day school class, the Rutheans, serv ing a buffet luncheon in the Sunday school assembly room, the room that was used for church dinners, socials and the like. This luncheon was to take the place of a home reception The details of the ceremony had been carefully practiced. Horace Langley.

royally alone. The key she thrust unconcernedly into the table drawer. She was not afraid of thieves. Her sigh was a great and glad one.

"At last fortune smiles upon the parsonage, and all the Tollivers in it." she whispered joyously. "Perhaps not much of a smile so far-just a little giggle, but a nice little giggle. The poor little church mice are going to surprise folks one of these days."

She wished greatly to tell her sisters of this sudden turn in the tide of the family fortune, but that little inner monitor, which Ginger most unscripturally called a hunch, warned her against this confidence, and she burled herself and her seething emotions as well as she could in plans for the following day.

Long before the high hour of noon on Helen's wedding day, she was daintily arrayed in her blue organdle. pirouetting up and down the hall from room to room, hurrying everybody, criticizing the general appearance of her sisters, oftering endless pert suggestions, and always inciting them to greater baste. (TO BE CONTINUED)

Peculiar Fitness of Trees as National Memorials

A few trees of the millions which | from Massachusetts he sent to the people the forests, farms and towns of the United States have been singled out by history to play famous parts and to stand as memorials to great events in the life of the country. "Symbolizing fully as well as tablet or pillar could do, some significant achievement, these trees represent the peculiar fitness of trees as memoriais, and it is specially ap-

hall of fame of their own," says the Forestry Almanac of the American Tree Association. Some distinguished trees stand out by reason of their age, such as the

Sequoia National park of California. its age is reckoned at 4,000 years, and it has a diameter of 23 feet and a height of 280. Many of the redwoods and sequolas are as old or nearly as old as this one.

When Charles Sumner was senator

Luck Alone Doesn't Win Luck may have its bearing, but on the whole luck is about evenly divided

for and against a man or his success. Often intelligence can turn luck in one's favor. In this connection no truer words were ever written than those of Ed-

ward Gibbon when he wrote, "The winds and the waves are always on the side of the ablest navigators." Luck may bring a young writer to the attention of a publisher, but luck alone could not be responsible for the many successful books of Kinling Dickens, or Wells .- Thirft Magazine.

czar of Russia an acorn from a tree near the tomb of Washington at Mount Vernon. This acorn grew to an oak in the palace grounds in St. Petersburg, and an acorn from it was planted in the White House grounds in Washington in 1904 and is now . prosperous young tree.

## Fifty-Fifty

The well-known Irish comedian, Talbot Farrell, tells the story of a typical "bull" perpetrated by one of his countrymen.

A small touring company was playing to rather meager audiences in a remote Irish town, and the manager, wishing to find out how the attendance at his show compared with the attendances at others, asked one of the local inhabitants how the theater was asually patronized.

"Oh, not so bad, not so bad," was the reply. "Sometimes it's half full, and sometimes it's half empty."-Pearson's Weekly.

# Shrubs Guarded by Law

To protect desert holly, Joshua trees and other growths of the deserts, California and Nevada recently have passed laws making it a misdemeanor to dig up, destroy or pick the flowers of some varieties of plants that grow in the dry places. Between Tonopah and Las Vegas, in southern Nevada, a wide expanse of desert country, severat hundred miles long, is called the West's largest and most beautiful natural flower garden .- Popular Mechanles Magazine.

as dirty as our faces from lachrymal glands in the upper outer corner of each eye. Some have additional tear glands at the sides of the eyes, as have reptiles.

Our skin is a double structure. The outside, or epidermis, is ectoderm; the inside, or dermis, is derived from the mesoderm. The fetal skin at first is translucent and not unlike that of fishes. During the third month, the epidermis begins to become horny, as it is in adult life. It is significant that if we lose a third of our skin by fire, acid, boiling liquid, or flaying. we lose our life.

Color of skin is an inherited trait and is due to grains of brown or yellow-red pigment in the dermis. Entire absence of pigment in skin, bair, and eyes is a developmental defect and results in albinos. Albinism is an inherited trait and is found in many animals. White blackbirds are as common as white black men. Pigment is probably due to secretion of an endocrine gland.

To form a better grasping surface, the skin of man's, monkeys', and many other mammals' hands and feet is thrown into minute ridges, especially prominent on the finger tips. These ridges form loops, spirals, and arches. In no two individuals on earth do they make exactly the same pattern. Hence their unique importance as marks of identification.

At the fourth month, the embryo hegins to show a fine silky hair coat or lanugo (down). This begins to be replaced, even before birth, by a second coat of different character. The lanugo may persist as "down" on the face of girls and women, or even all over the body, as on the so-called dogfaced people of the menageries. The lanugo probably represents our adult ancestral condition. But no satisfactory theory has yet been advanced to account for the fact that man is the least hairy of the primates.

Hair does not grow on our bodies in haphazard fashlon, but in lines and sets of three, four, or five, each set being the hairs that grew beneath one scale of our reptillan ancestors. (2) by George A. Dorsey.
