

This Little Girl Got Well Quick

"Just after her third birthday, my little daughter, Connie, had a serious attack of intestinal flu," says Mrs. H. W. Turnage, 217 Cadwalder St., San Antonio, Texas. "It left her very weak and pale. Her bowels wouldn't act right, she had no appetite and nothing agreed with her.

"Our physician told us to give her some California Fig Syrup. It made her pick up right away, and now she is as robust and happy as any child in our neighborhood. I give California Fig Syrup full credit for her wonderful condition. It is a great thing for children."

Children like the rich, fruity taste of California Fig Syrup, and you can give it to them as often as they need it, because it is purely vegetable. For over 50 years leading physicians have recommended it, and its overwhelming sales record of over four million bottles a year shows it gives satisfaction. Nothing compares with it as a gentle but certain laxative, and it goes further than this. It regulates the stomach and bowels and gives tone and strength to these organs so they continue to act normally, of their own accord.

There are many imitations of California Fig Syrup, so look for the name "California" on the carton to be sure you get the genuine.

ANYWAY, HE KNOWS HIS COWS

During the World War a very patriotic old lady was passing a farmer's barn one day and observed a young farmer boy milking a cow. He looked to be old enough to be in the army, and she was indignant to find him on the farm. He saw her, but didn't stop milking.

"Why are you not at the front?" asked the indignant patriot, and the quick reply was:
"Cause thar ain't no milk at thar end."—Association News.

"Collectors" to Fight Menace of Insect Life
The stamp collector, the cigar-band fan, the hoarder of specimens of hotel china and other such collectors are about to be pushed aside by a coming generation of collectors, who are likely to specialize in gathering insects.

In this case the childish hobby is to have a real benefit to the country. The growing menace of insect life to the larder of the future has spurred the Department of Agriculture to awaken early in the life of young students an acquaintance with their tiny enemies and to teach gathering and control methods.

To further this end a bulletin is being issued for distribution in schools, giving data on various types of insects and describing how they should be collected and preserved.

The whole field of collecting, including the exchange of specimens, and so on, is covered in the comprehensive work. It soon may become a common sight to see youthful types of the scientist out stalking beetles, lady birds, aphids and such specimens.

FAMILY DOCTOR LEARNED THIS ABOUT CONSTIPATION

Dr. Caldwell loved people. His years of practice convinced him many were ruining their health by careless selection of laxatives. He determined to write a harmless prescription which would get at the cause of constipation, and correct it.

Today, the prescription he wrote in 1885 is the world's most popular laxative! He prescribed a mixture of herbs and other pure ingredients now known as Dr. Caldwell's Syrup Pepsin, in thousands of cases where bad breath, coated tongue, gas, headaches, biliousness and lack of appetite or energy showed the bowels of men, women and children were sluggish. It proved successful in even the most obstinate cases; old folks liked it for it never gripes; children liked its pleasant taste. All druggists today have Dr. Caldwell's Syrup Pepsin in bottles.

Linters, the fuzz on cottonseed, are used in making automobile tops, camera films, casings for sausages, fine paper and leather substitutes.

We shall be judged, not by what we might have been, but what we have been.—Sewell.
