

THE TURNER TRIBUNE

Turner, Oregon, Thursday DEC 5, 1929
 F. H. Rowley, Editor

Published Every Thursday at Turner, Marion County, Oregon
 SUBSCRIPTION \$1.25 PER YEAR. Entered as the Postoffice at Turner, Oregon, as second-class matter, under the Act of March 3, 1879.

I pledge allegiance to the Flag of the United States and the country for which it stands. One nation, indivisible, with liberty and justice for all.

To Our Patrons and Subscribers

There are times during the lifetime of a business enterprise when, due to pressure of slack times, it becomes necessary to curtail or suspend the business. We have reached that period in our business adventures in Turner. The Tribune has been established in Turner something over fourteen years. Nearly seven years of that time the undersigned has been at the helm. During that time we have endeavored to give you a paper, devoid of personal or community strife, that would represent the community as nearly as is possible to do so.

Many of our subscribers are in arrears for various lengths of time. Some said they did not want the paper to stop, and have promised several times to bring in the necessary material to keep the paper in the press, but have failed to do so. Perhaps, in many instances we have been too easy in this matter by not sending bills. However, that may be, we have reached the critical time, and unless we receive what is in arrears, or some of it at least, within the next few days, we will be compelled to suspend publication for a time at least.

It comes to this it is not our intention to quit entirely. We will still maintain our job department, and some time in the future, whenever conditions make it feasible, we shall resume publication of The Tribune.

We are making this statement with all due respect to our many friends in Turner. We believe we can say we have no enemies in the Turner vicinity, and it is our intention to remain in your midst.

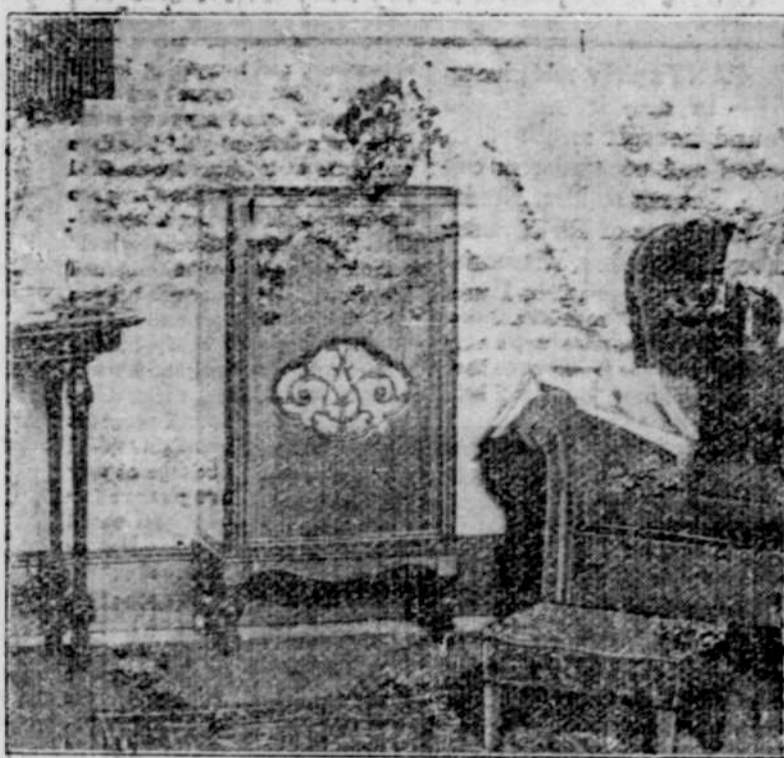

All subscriptions paid ahead will be credited ahead when publication is resumed, so that you will get your full time, in that we are compelled to adopt the above program.

F. P. ROWLEY, Editor.

Turner Community Club organized

At last there is a real live community for Turner and vicinity. The first attempt along this line since we have been a member of this community was some five years ago when the Turner Posters was organized. This organization functioned for a while with varying successes until it finally evaporated by degrees until there was nothing left. The organizing of a real community club has been agitated by the business men and others of the community interested until the end has been accomplished and the community now has a club that is affiliated with the Marion County Federation. There is no end of benefits that can accrue to the community through one of these clubs. The greatest benefit that can be derived is the developing of a community spirit and obliterating all jealousies and antagonisms. When this is done it is all done for there is nothing then, to hinder the same developing of the community.

SCREEN GRID GIVES FARM NEW RADIO

One Example of the Newest Battery Sets Which Offer Really Modern Radio to Unwired Homes.

The real split between the requirements of rural and city listener-in-home, with the introduction of the loudspeaker in place of horn speaker, says E. A. Nicholas, Vice-President of the Radio-Victor Corporation of America. "Until then the usual battery radio set, especially when operated with dry cells, could serve both rural and city family equally well. With the loud-speaker there arose a demand for more power and better tone, with a decrease in operating cost, all of which led to better power. "Now radio engineers have turned to the requirements of the unwired home, eager to duplicate what has been achieved for city and town. Starting with current conservation as the ideal, they have evolved loudspeakers supplying ample volume and rich tone from a minimum input. "The recent development of the screen-grid tube, with an amplification factor several times that of the usual three-element or standard battery tube, also has been a step in the direction of the ideal battery set, indeed, with a single screen-grid tube replacing between two and three of the usual tubes for the radio frequency end, and when also used as the detector, replacing the first audio tube as well, battery current consumption has been reduced to new low levels. "Less current consumption, combined with the possibilities of greater volume and better tone through refined loudspeaker design, have made possible a battery-operated radio set about on a par with the average socket-power radio set, plus the advantage of a noiseless background for tuning distant stations. "The combined engineering and research forces of the Radio Corporation of America have been at work on this new conception of an efficient battery-operated radio receiver. After many months of intensive effort, such Radiolas have been developed. These new sets are not simply revamped versions of old storage battery or dry battery radio sets. They are entirely new conceptions of battery-operated sets, designed to establish rural radio more on a par with metropolitan radio. In sensitivity, selectivity, simplicity, economy, tone and power, there is little more to ask."

NOTICE TO CREDITORS

Notice is hereby given that the undersigned, by an order of the County Court of Marion County, State of Oregon, duly made and entered on the 31st day of October, 1929, was appointed administratrix of the estate of Mathilda Browning, deceased, and that she has duly qualified as such. All persons having claims against said estate are hereby notified to present the same, duly verified as required by law, at the offices of Guy O. Smith, 408 Salem Bank of Commerce Bldg., in the City of Salem, Marion County, Oregon, within six months from the date of this notice, to-wit: November 7, 1929.

HATTIE B. TUNE, Administratrix of the Estate of Mathilda Browning, Deceased.
 GUY O. SMITH, Attorney for Administratrix.

SUMMONS

In The Circuit Court of The State of Oregon For The County of Marion, Oregon, Department No. 2
 Phyllis Carry Incledon, Plaintiff,
 vs.
 Leonard Rano Incledon, Defendant.

To Leonard Rano Incledon, Defendant: You are hereby required to appear and answer the complaint filed against you in the above entitled Court and cause on or before four weeks from the date of the first publication of this summons, and if you fail to answer or appear herein on or before said time, for want thereof, plaintiff will apply to the said Court for a decree dissolving the marriage contract and bonds of matrimony now subsisting between you and the plaintiff, Phyllis Carry Incledon, and for such other and further relief as to the Court may appear just and equitable.

This summons is served upon you by publication thereof once a week for four consecutive weeks in the Turner Tribune, a weekly newspaper of general circulation published at Turner in Marion County, Oregon pursuant to an order of the Hon. L. H. McMahan, Judge of the Circuit Court of the State of Oregon for Marion County, made and entered on the 18th day of November, 1929.

You are further notified that the date of the first publication of this summons is the 21st day of November, 1929.

Brazier C. Small, Attorney for Plaintiff
 Residence and post office address, Salem, Oregon.

MEDAL TO OPERATOR 11,000 MILES AWAY

Malcolm P. Hanson, With Byrd Near South Pole, Hears Tribute.

One of the most striking methods of making an award of merit ever devised was the recent presentation of the Veteran Wireless Operators' Association medal in a speech by David Sarnoff in New York to Malcolm P. Hanson, radio operator with Byrd, listening by radio in the Antarctic water near the South Pole. Mr. Sarnoff, Executive Vice-President of the Radio Corporation, praising Hanson, mentioned also the fortitude of the wife of the operator, who had consented that her husband go on the hazardous expedition for the sake of science. After she had received the medal for safe keeping, Mrs. Hanson, deeply touched, spoke to her husband across the vast distance. Within a

Mrs. Malcolm P. Hanson, Holding Medal Awarded to Her Husband, 11,000 Miles Away.

few minutes Hanson's reply came by radio telegraph through the receiving station of J. C. A. Communications, Inc., at Riverhead, Long Island. In addition to thousands at the Radio World's Fair, where the presentation was made, an uncanny throng heard the tribute over the network of the National Broadcasting Company. "It is my privilege," Mr. Sarnoff said, "to pay tribute tonight to a man who has made an unusual contribution to science and civilization. Although he is 11,000 miles distant from this glass-enclosed room in Madison Square Garden, where I now stand, he is nevertheless able, through the instrumentality of Radio, to listen to the sound of my voice. That fact alone is worthy of commemoration, even in this day of extraordinary progress in science."

Malcolm P. Hanson, as Chief Radio Operator of the Byrd Antarctic Expedition, you have been awarded the annual medal of the Veteran Wireless Operators' Association, for the most distinguished contribution, by a radio operator, in 1928, to wireless communication. As a member of that association, with some knowledge of its romantic traditions and standards of service, I feel that the award is well earned and well deserved."

Mr. Sarnoff related how Hanson planted his slender steel towers on the edge of the great ice barrier, cheered

his comrades with news from home and gave the world for the first time a thrilling daily account of a polar expedition. Those things alone would have been a contribution to history, he said, but Hanson added to radio knowledge by testing signals against the polar sky, observed the phenomena of the Aurora Australis and made a record of radio behavior under conditions hitherto unknown. To Mrs. Hanson, Mr. Sarnoff said:

"Your sacrifice was all the greater because soon after your husband sailed for the Antarctic, you bore him a child. No medal can ever reward or repay you for your own courage and heroism."

RADIO TELEGRAPH EXPANDS SERVICE

Recent additions to the radio telegraph service from the United States are of special interest now as indications that America is striving to hold her own in a radio telegraph leadership, which is made more difficult to maintain by the British merger of radio telegraph and cables. The announcement that R.C.A. Communications, Inc., will begin work at once to establish an inland telegraph network in fourteen strategic cities in the United States, will bring for 22 inland stations, as wave lengths are granted, also has added to the country-wide attention to this modern means of communication.

Within the last few weeks three new direct international circuits have been announced by W. A. Winterbottom, Vice-President in charge of Communications of R.C.A. Communications, Inc., to Spain, Syria and Costa Rica.

Several reductions of rates for radio telegraph service also have been announced recently by Mr. Winterbottom. It was the competition of radio telegraph which forced a reduction of cable rates by which users have saved \$60,000,000 in the last eight years.

Radio Reaches Out To Many Other Arts

In addition to transoceanic service, radio, now being developed as a point-to-point communication system, promises this year to add considerably to the transcontinental telegraphic facilities of the United States, according to David Sarnoff, Executive Vice President of the Radio Corporation of America.

"Radio as a service to the home has been reaching out for association with other established arts of entertainment and education," Mr. Sarnoff says. "In the refinement of musical and speech reproduction, in combination with the modern phonograph to render the two distinct services involved in broadcasting speaking upon the one hand, and in recording, selective process upon the other, in the field of sound motion picture development, radio faces another season of progress."

"It includes in its scope both sound and sight, both color and perspective. "It is the first system of communications that has largely removed the limitations of time and space from the distribution of music and speech; it promises eventually to transmit the spectacles of life by sight communication. No channel of transmission offers a greater field of expression to the entertainment art."

INSTITUTE TO FORM SCHOOLS OF RADIO

Announcement just has been made of the formation of the R.T.A. Institute, Inc., a subsidiary of the Radio Corporation of America, for the purpose of establishing radio schools in various cities throughout the country to meet the steadily increasing demand for trained radio men. The organization is the successor to the Radio Institute of America, formerly the Marconi Institute founded in 1909 and the oldest commercial radio school in existence. Rudolph L. Duncanson, for many years Director of the Radio Institute of America, is president. General J. G. Harbord, president of the Radio Corporation of America, is Chairman of the Board.

Headquarters and the main school will be at 326 Broadway, New York. The new organization has acquired also the Philadelphia School of Wireless, founded in 1911, and the Eastern Radio Institute of Boston, founded in 1912.

FURTHER GAIN FOR RADIO IN SCHOOLS

With the beginning of the winter school term the radio loudspeaker has taken its place beside the blackboard as an aid to teaching. According to Quinton Adams, Vice-President of the Radio-Victor Corporation of America thirty schools in various parts of the country have begun the new term equipped with centralized radio apparatus for the distribution of educational programs to the classrooms and between sixty and seventy other schools are planning similar installations. Every school year brings an extension of education by radio.

The first test under practical dairy-feeding conditions of providing radio music for cows has proved a big success, according to officials of the Detroit Creamery Company, near Mount Clemens, Mich. The creamery company officials bought RCA loudspeakers for each of their barns when they noticed the cows liked the music from a Radiola receiving set installed to entertain the men doing the milking. Now all the 900 cows on the model farm enjoy radio programs.

CHRISTIAN CHURCH

Radio Artist to sing next Sunday. The next Lord's day program is for Music about Music, and will consist of extra musical numbers. The ebrous singing directed by Dr. Epley and special numbers will be good. But the chance to hear a real artist at home will be given to Turner.

Little Miss Linsley will sing. She is just 8 yrs. old but sings over the radio and for concerts and programs. It will be a trial to hear her and then sermon on music follow.

Last Sunday Earl Confer the minister that was with the church last year paid the congregation a visit and preached the evening sermon.

There has been 25 names added to the church membership since Sept. This goes to show the world is not growing worse but that things are living and growing as truly as ever.

Archibald-Siddell

A very pretty wedding was held at the Christian church, Sunday afternoon at 4 o'clock, when Miss Evelyn Archibald became the bride of Earl Confer. The bride was given away by her father, R. E. Archibald. Her sister, Mrs. Ella Hughes, of Seattle, was matron of honor. Miss Dorothy Moore was bride's maid and Otto best man. Ushers were Lucile White, of Portland, Agnes Moore, of Salem. Mable and Maude Archibald, Miss Eleanor Moore sang, "At Dawning" and "Always", accompanied by Miss Ruth Bedford, of Salem, at the piano. Earl Confer, a former pastor, officiated, using the ring ceremony. A reception was given the bride and groom in the church parlors following the ceremony, after which they left for Portland on a short honeymoon.

Mr. and Mrs. J. F. Thomson had as their dinner guests on Monday, Rev. Earl Confer and wife.

Webster's New International Dictionary. Get The Best. The "Supreme Authority" in courts, colleges, schools, and among government officials both Federal and State.
