

THE TURNER TRIBUNE

Turner, Oregon, Thursday, JANUARY 2, 1930

H. H. Rowley, Editor

Issued Every Thursday at Turner, Marion County, Oregon

SUBSCRIPTION \$1.25 PER YEAR. Entered at the Postoffice at Turner, Oregon, as second-class matter, under the Act of March 3, 1879.

"I pledge allegiance to the Flag of the United States and the country for which it stands. One nation, indivisible, with liberty and justice for all."

China Stands for Rights

China has announced that after the first of the year there will be no more extraterritorial rights granted to foreign powers but, hereafter all foreigners in China must come under the jurisdiction of the Chinese courts. For the past 80 years nearly all nations have maintained their own courts and law enforcement. A howl is going up from all quarters of the globe against this action of the Chinese government. As far as we know the Chinaman in America is not allowed trial by his own courts, in this country for any misdemeanor he may commit, but is tried under our own courts. Why should the foreigner have these rights in China? Is it not just as fair for the one as the other? If the nationals of other countries become involved with the Chinese law why should they not be tried by the Chinese courts?

The Prohibition Tangle

Congress is just now in a turmoil over the enforcement of the prohibition law. Some of the wet senators are calling for light wines and beer. Some of the radical dries are shouting that the Administration policy in the enforcement of the Volstead act is a failure. Some of them are calling for the resignation of Secretary Mellon. This demand has been made by Senator Norris, of Nebraska, Republican dry who supported Al Smith in the last election. We agree with the Portland Telegram that in place of removing Secretary Mellon from office, remove the duties of the enforcement of the prohibition law from the treasury department. The enforcement of prohibition belongs and should have been placed under the supervision of the department of justice long ago. The attorney general is the law enforcing officer of the government, not the secretary of the treasury.

NOTICE TO CREDITORS

Notice is hereby given that the undersigned, by an order of the County Court of the State of Oregon, for the County of Marion, duly made and entered on the 6th day of December, 1929, was appointed administratrix of the Estate of J. McD. Headrick, deceased, and she has fully qualified and is now acting as such administratrix.

All persons having claims against the said estate are hereby notified to present the same, duly verified as required by law, to the undersigned at 219 U. S. National Bank Building, in Salem, Oregon, within six (6) months from the date of the first publication of this notice.

The date of the first publication of this notice is December 19, 1929.

MARGARET E. HEADRICK, Administratrix of the Estate of J. McD. Headrick, Deceased.
FRED A. WILLIAMS, Attorney for said Administratrix, 219 U. S. National Bank Building, Salem, Oregon.
Dec. 19, 26, 1929-Jan. 2, 9, 16, 1930

NOTICE OF HEARING OF FINAL ACCOUNT

In the County Court of the State of Oregon, for the County of Marion, in the matter of the Estate of Melvin Thomas Miller, Deceased.

Notice is hereby given that the final account of Stella L. Miller, administratrix of the estate of Melvin Thomas Miller, deceased, has been filed in the County Court of Marion County, Oregon, and that the 24th day of January, 1930, at the hour of 10 o'clock a. m., has been appointed by said court for hearing objections to said final account, at which time any persons interested in said estate may appear and file objections thereto in writing and contest same.

STELLA L. MILLER, Administratrix.
MARTIN F. FERREY, Attorney for Estate, Salem, Oregon.

SUMMONS

In the Justice Court for Salem District, Marion County, Oregon. Civil action to recover money.

E. J. Harrison, Plaintiff, vs. Henry Dwinell, Defendant.

To Henry Dwinell, the above named defendant:

In the name of the State of Oregon, you are hereby required to appear and answer the amended complaint filed against you in the above entitled action within four weeks from the date of the first publication of this summons, to-wit: from the 2nd day of January, 1930, and if you fail to appear, for want thereof plaintiff will take judgment against you as follows, to-wit:

1. For the sum of \$41.91 and for plaintiff's costs and disbursements incurred in this action.
2. That the final proceedings be had for the sale of all of your right, title and interest in and to the following described personal property, to-wit: Money in the sum of \$28.86 being wages due to you from the Southern Pacific Company, and one yearling grade Jersey heifer, by the sheriff of Marion County, Oregon, or the constable of any district therein, according to law and the practice of the above entitled court, and that the proceeds of said sale be applied to the amounts due plaintiff, and that you and all persons claiming through you,

WHAT'S WRONG AND WHERE?

How good are you at finding mistakes? The artist has intentionally made several obvious ones in drawing the above picture. Some of them are easily discovered, others may be hard. See how long it will take YOU to find them.

RAISING RABBITS IS MONEY MAKING ENTERPRISE

Money is being made with rabbits on many farms, says the Sears-Roebuck Agricultural Foundation. The rabbit raising industry undoubtedly has a great future.

The decreasing supply of wild fur bearing animals and the increasing use of furs for clothing are steadily increasing the demand for rabbit skin, which is now the most extensively used fur. In the United States, alone, about 100,000,000 rabbit skins are used annually, of which 98 per cent are imported. The flesh of young hutch rabbits resembles the white meat of chicken.

Feed costs of rabbit production are low. Alfalfa hay, oats and barley, and roots especially carrots, and some green feed such as lawn clippings are extensively used. Buildings need not be expensive. By using multiple hutches, a large number may be produced on a small area in back yards.

A prolific doe will easily produce 20 to 25 young in a year. Young rabbits may be bred at 7 to 8 months of age. The Chinchilla, American White, New Zealand Blue, New Zealand White, New Zealand Red, and White Flemish are the varieties most extensively produced in the United States.

Size, texture of fur, color, and the care given the pelt after removing are the chief factors in the price of rabbit skins. Fine pelts are often secured by careful handling, Chinchilla White, and Red, in the order named take precedence over other colors. Marketing methods are being improved so that small breeders are now able to obtain the full commercial value for their pelts, the Foundation adds.

CLYVERDALE

Mr. and Mrs. Earl Neer and son Mearl left Monday to spend several days with Mrs. Neer's parents near Corvallis.

Mr. and Mrs. Anderson spent Sunday with relatives near plain view.

Mrs. Louise Kunke spent Christmas with her son and family Mr. and Mrs. Arthur Kunke.

Mrs. Nelly Hamilton spent Christmas with Norman Hamilton of Salem.

Mrs. Carl Booth attended the teachers convention in Portland last week.

Mrs. Lula Chapman of St. Helens, and Mrs. Chappman's daughter and husband of Woods Ore. were all visitors at the home of Mr. and Mrs. H. Wipper Saturday.

Miss Inez Barnett spent several days last week with Miss Mildred Schifferer.

Mrs. Hennessey was a business visitor in Salem, Monday.

Health Demonstration To County

On January 1 the Commonwealth Fund, of New York City turned over the administration of the Marion County Health Demonstration to the Marion County Health Unit. This marks the end of a five year experiment in Marion county. The Commonwealth Fund has spent nearly \$300,000 in this county in an effort to find out just what could be accomplished in a health campaign among children. They have bought equipment for this work including cars used by the nurses

scales, office equipment and filing cabinets. This is all to be left free of charge for the County Health Unit as they continue the work.

The fund has furnished the money to carry on this work. Year by year the City of Salem, Salem School board, and the county court have given a small amount. The amount given by the three contributing agencies has been increased each year so that this year each are giving \$8,000 with a small additional amount from Silverton, Mill City and Gates. The Commonwealth Fund are continuing their help to the amount of \$12,000 that the work may be continued when they withdrew this week.

A careful tabulation of all work done has been kept. This is being studied by Dr. Estella Ford Warner who stays in Salem for a few more months to study the permanent records which are to be left here. The work done in this county will be written up and published by the Commonwealth Fund at some later date.

Have we, in this community of Turner, really appreciated just what has been done for our boys and girls the last five years? Have we always given careful consideration to the cards brought home and cooperated with the work the Health Unit is trying to do?

This morning Dr. Edward Lee Russell assisted by Miss Margaret McAlpine is conducting a school clinic here. In the afternoon a pre-school clinic is being held at the Turner High School.

Prathers Hosts At Dinner Party

Mr. and Mrs. E. S. Prather entertained Thursday with a dinner. A miniature Christmas tree, daintily decorated, was used for the center piece and covers were laid for Mrs. Prather's parents, Mr. and Mrs. N. W. Hutchens of McMinnville, Mrs. Leona Fuller of Silverton, Darrel W. Hutchens of Tacoma, Floyd Zettberg of Silverton and the hosts Mr. and Mrs. Earl S. Prather and son Stanford, Jr. Hutchens is a brother of Mrs. Prather. He enjoyed a week furlough from the navy, being stationed on the U. S. S. Lexington now at Tacoma.

Class Entertained At Peterson Home

Miss Lillian Peterson teacher of the junior boys and girls class of the Christian church entertained with a Christmas party for her class. A large Christmas tree was a special feature and gifts were exchanged among the guests. All the class attending participated in numerous games during the afternoon, after which the hostess served refreshments.

Family Reunion At Ransom Home

A family reunion was enjoyed Christmas day at the home of Dr. and Mrs. J. W. Ransom when their children and families gathered for the day. Guests were Mr. and Mrs. H. O. Perkins and daughters Mildred and Pauline of Waterloo; Harve Ransom of Lyons; Mrs. Susie Ransom and sons Harold and Wayne of Aunsville; Mrs. Mary F. Olier and Mrs. Effie McGovern of Portland; Thomas Ransom of Aunsville; Mr. and Mrs. J. J. Ransom of Shelburn and the hosts Dr. and Mrs. J. W. Ransom.

S. S. Convention Stayton - Sunday

The Santiam District Bible School will hold their first convention of 1930 this coming Sunday, January 5, meeting with the Methodist Bible School of Stayton. This is an all day meeting with basket dinner at noon.

Harrison's General Store for Drygoods, Groceries Glassware, Hardware Boots and Shoes Wet weather goods Highest prices for farm produce

We Give S & H Cash Discount Stamps

Turner, Oregon

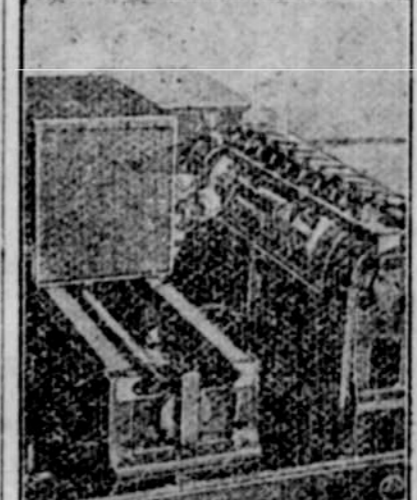

Every one is invited to come, bring well filled lunch basket and spend the day. You will be well paid. Please note the following program. In addition to the regular numbers listed a special number is expected from each Bible school in the district.

Beginning at 10 o'clock there will be a song service with devotionals led by Herbert Bennett Jr., song by intermediate girls class of the Stayton Methodist Bible School followed by the lesson study, after which there will be a solo by Felix Wright and an address by Prof. James T. Matthews, of Willamette University, followed by a basket dinner.

Beginning at 1:30 P. M. there will be a song service followed by a devotionals led by W. J. Lyman, pastor of the Christian church. This will be followed by the business meeting, discussions and special music, closing with an address by Rev. Norman Kendall Tully, pastor of the First Presbyterian church of Salem.—Salem Papers Please Copy.

Photocards, has made such strides recently that it promises more than ever to fulfill some day the forecast of Owen H. Young at a dinner given in 1923 to General James G. Harbord, President of the Radio Corporation, that it eventually will make it possible to flash whole pages of newspapers across the ocean.

The most recent developments are the simplification of photoradio apparatus, greater speed and the reduction in rates between New York and London which just has been announced by W. A. Winterbottom, Vice President in charge of communications of R. C. A. Communications, Inc. The reduction was made possible by the simplification and the greater speed. The new rate is figured in centimeters.

The "heart" of a high speed facsimile transmitter

but is approximately \$2 a square inch. The old rate was \$3.20 a square inch. The accompanying cut shows the group of lights, called the "doughnut light," which center illumination on a point on the picture or printed matter placed on a roller across from them. This light beam is reflected into the photocell box behind the lights. The "doughnut" is on a carriage which moves across and back in front of the roller. After every trip the carriage makes from one side to the other, the roller turns ever so slightly.

As the spot of light from the "doughnut" passes back and forth the lightness and darkness of the points it touches change the intensity of the reflected beam. The reflected beam produces electrical impulses, which are amplified, sent by radio to a receiver hundreds of miles away and changed by the receiver to electrical impulses again. These electrical impulses cause a neon light to glow at intervals timed perfectly with the beam of light reflected from the picture on the transmitter. The glow of the neon light is reproduced on photographic paper, placed in the same position on a roller on the receiver that the original is on the transmitter. Thus an exact duplicate of the original is made.

"No Collection, No Charge" Delinquent accounts collected on a contingent basis. We do the work, shoulder the expense and make no charge unless collection is made. \$250,000 Bad Accounts turned into Cash Since We Started. Jot down a list of bad ones and let us turn them into actual money. Business Men's Adjustment Company

NEW RADIO TRENDS STRESSED IN SHOWS

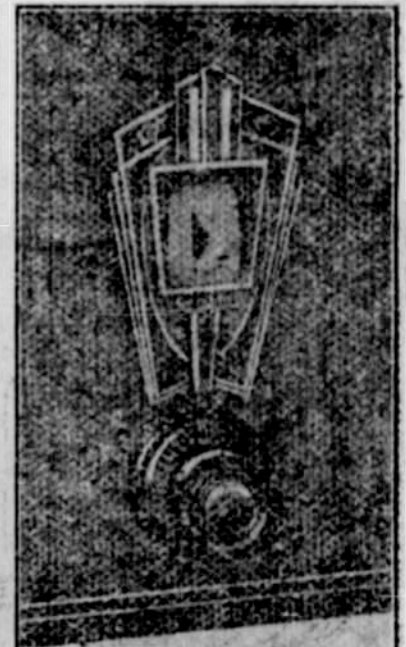

Simplified Tuning and Screen Grid Tubes Are the Big Features.

Simplification in tuning, popularity of screen grid tubes and exceptionally artistic cabinets for radio receivers are among the outstanding features of the radio shows which now are in progress throughout the United States. Quantity production has brought the greatest values ever offered.

An innovation in the offering by one of the largest manufacturers of the first battery operated Radiolas whose performance is comparable to those of socket power. This development, made possible by loudspeaker refinements and the increased efficiency of the screen grid at a low current consumption, is being welcomed by owners of homes unprovided for electricity.

Although the screen grid leads in the new models as a radio frequency amplifier, another new Radiotron, the UX-245, is used widely as an outstanding part of the audio systems. The UX-245 and other standard tubes also retain their popularity for the specific uses for which they are best suited.

The famous super heterodyne circuit is employed in one of the newest Radiolas, attracting attention at the shows, but quantity production has put this model for the first time in a price class within the reach of the vast majority of listeners.

The entire control mechanism of one modern radio receiver. Illuminated dial numbers show on the escutcheon window when the set is turned on.

Simplified tuning in some models exhibited takes the form of tuning and volume control from one combination knob. In others it is aided by a magnified tuning scale which throws illuminated numbers of a scale which can be read easily upon a translucent composition window in the escutcheon. This Radiola tuning scale is the research laboratory's answer to the problem of tuning receivers placed in positions where the light is not good.

In the Sixth Annual Radio World's Fair in New York a radio Pageant of Progress, prepared at a cost of more than \$100,000 by the Exhibition Division of the Radio-Victor Corporation, traced by means of historic apparatus, replicas and true to scale models the story of radio from Marconi to the present. Similar historical exhibits of radio are being placed by Radio-Victor in other shows. George Clark, manager of the Exhibition Division, is secretary of a committee cooperating with the Smithsonian Institution and government officials in creating a national museum of radio, which eventually will house many of the exhibits being shown by his company.

Television demonstrations under the auspices of the Radio Corporation at the New York show indicated real progress, but the engineers whose brilliant work was responsible for the improvements were careful to point out that other problems still remained to be solved before television would be practical for home sets.
